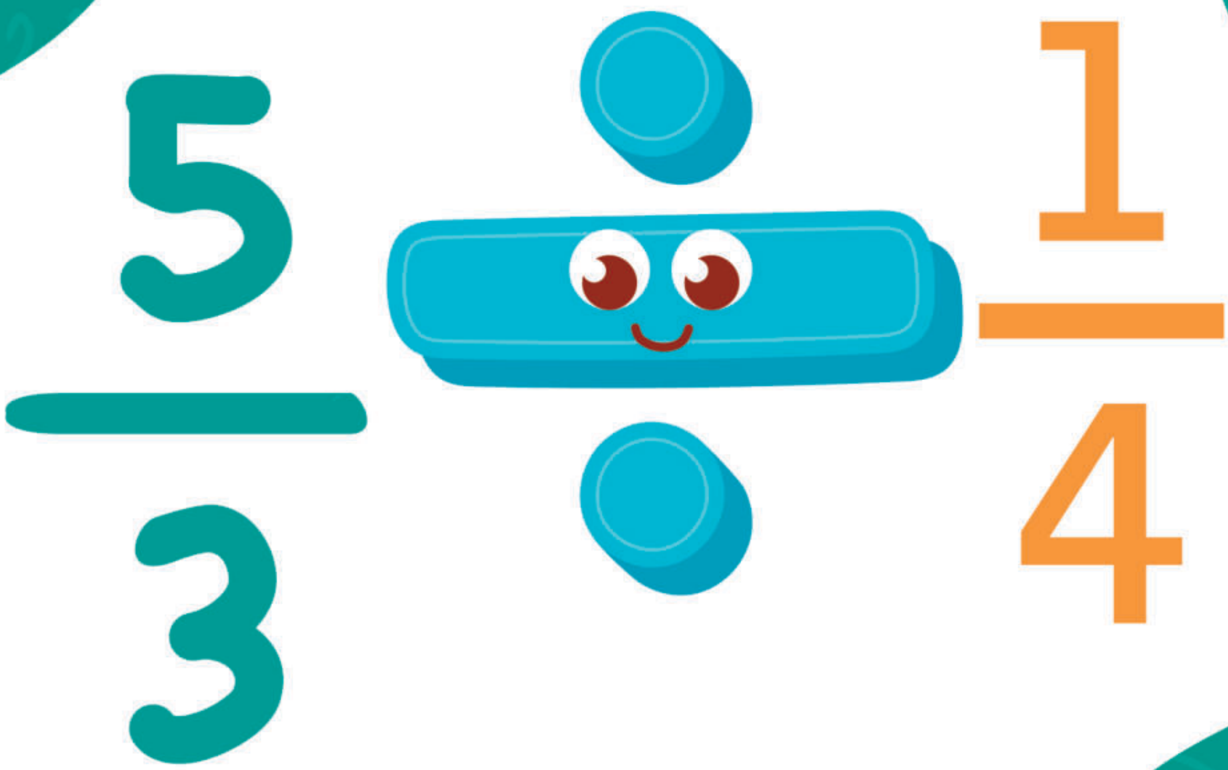
5

DIVISION



- **Division.**

It is the inverse of the multiplication operation. Division is splitting into equal parts or separating items into groups. While dividing numbers, we break down a larger number into smaller numbers.

There are two basic division symbols that represent the division of two numbers. They are ÷ and **/**.
For example, 4 ÷ 2 = 2, and 4/2 = 2.
There are four parts of the division, which are dividend, divisor, quotient, and remainder

$$
\begin{array}{rrl}
 & 13 & \longrightarrow \text{Quotient} \\
\text{Divisor} \longleftarrow 8 \big) & 105 & \longrightarrow \text{Dividend} \\
 & -\ \ 8 & \\
\hline
 & 25 & \\
 & -24 & \\
\hline
 & 1 & \longrightarrow \text{Remainder}
\end{array}
$$

Dividend = Divisor x Quotient + Remainder

105 = 8 x 13 + 1

- **Solve the following.**

16	÷	2	=	
24	÷	6	=	
48	÷	1	=	
9	÷	3	=	
15	÷	5	=	
32	÷	8	=	
18	÷	9	=	
40	÷	8	=	
28	÷	7	=	
45	÷	9	=	

- **Solve the following.**

$3\overline{)12}$

$6\overline{)36}$

$4\overline{)20}$

$9\overline{)27}$

$7\overline{)21}$

$9\overline{)63}$

$6\overline{)6}$

$6\overline{)24}$

$4\overline{)32}$

$8\overline{)72}$

$5\overline{)30}$

$7\overline{)14}$

$8\overline{)24}$

$9\overline{)54}$

$4\overline{)16}$

- **Solve the following.**

$7\overline{)50}$

$2\overline{)19}$

$6\overline{)37}$

$5\overline{)26}$

$7\overline{)43}$

$9\overline{)77}$

How to Divide

1. Divide.

$41 \div 7$

7×5

2. Subtract and compare.
Be sure the number is less than or equal to the divisor.

$41 - 35$

3. Bring down the next number.
Divide again.

$63 \div 7$

7×9

4. Subtract and compare.
Be sure the number is less than or equal to the divisor.

$63 - 63$

$$\begin{array}{r}
59 \\
7\overline{)413} \\
-35 \\
\hline
63 \\
-63 \\
\hline
0
\end{array}$$

- **Dividing 3-digit numbers by 1-digit numbers.**

$3\overline{)236}$	$4\overline{)315}$	$5\overline{)494}$
$6\overline{)341}$	$9\overline{)818}$	$7\overline{)569}$
$7\overline{)595}$	$3\overline{)181}$	$5\overline{)215}$

$3\overline{)240}$

$8\overline{)752}$

$5\overline{)171}$

$4\overline{)399}$

$6\overline{)111}$

$9\overline{)188}$

$7\overline{)595}$

$10\overline{)181}$

$11\overline{)171}$

• Word Problems

Q1: If 432 litres of water are divided equally into 9 tanks. How many litres does each tank hold?

Answer: ____________________

Q2: A carton contains 240 pencils, and there are 8 boxes in the carton. How many pencils are there in each box?

Answer: ____________________

Q3: If 672 candies are equally divided among 8 children. How many candies does each child get?

Answer: ______________________________

Q4: A truck carries 1,200 kilograms of goods and distributes them equally across 4 warehouses. How many kilograms of goods does each warehouse receive?

Answer: ______________________________

Q5: There are 1,560 apples packed into 6 crates. How many apples are in each crate?

Answer: ____
