- Manipulate selections by moving, copying, resizing, and rotating.
- Use the Rotate tool to adjust image orientation.
- Manage files by opening, saving, and setting images as wallpaper.

UNIT 6

ADVANCED MS PAINT

Earlier, we learnt about the basics and drawing tools of MS Paint. Now, we are going to discuss some more advanced tools in Paint. After learning those tools, you can format the drawings, change the look and orientation of the images. Now, let us explore these features of MS Paint.

ADVANCED TOOLS IN MS PAINT

1. COLOUR PICKER TOOL

The Colour Picker tool helps you pick a colour from one part of the figure and fill the same colour in any other part of the drawing.

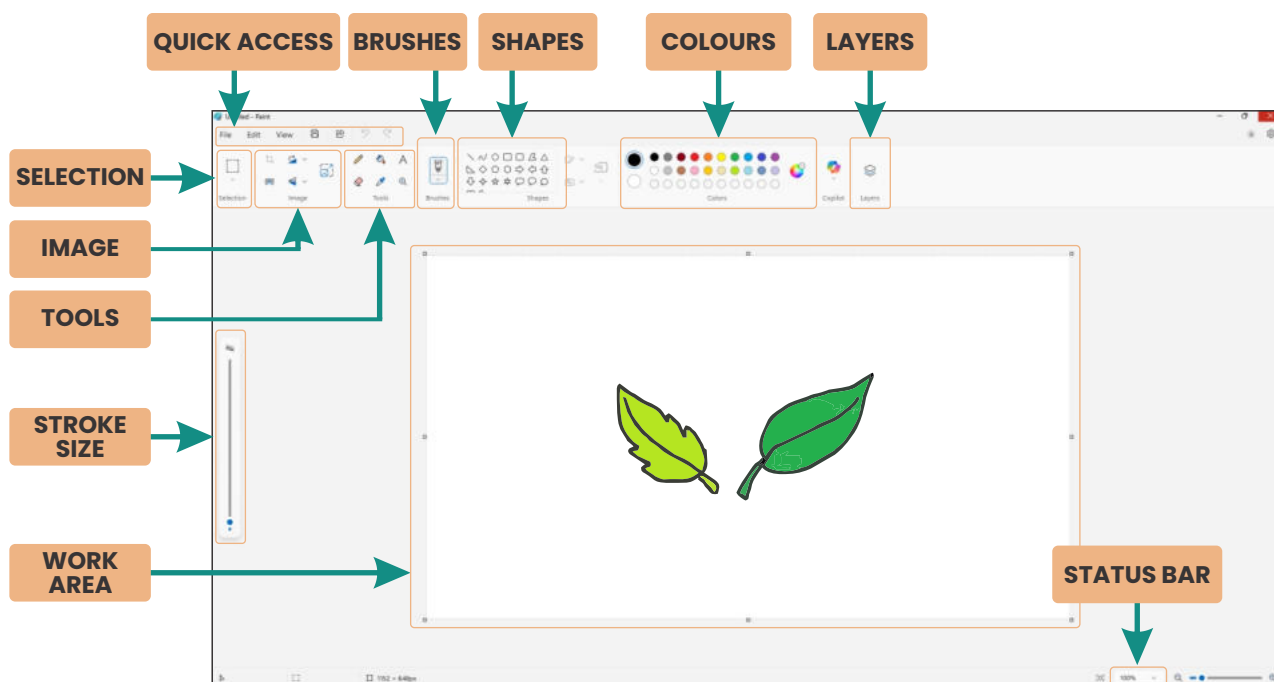

- **Steps to Use the Colour Picker Tool:**

1. On the Home tab, in the Tools group, click on Colour picker.
2. Click on the required colour in the drawing that you want to set as the foreground colour (or right-click the colour in the drawing if you want to set it as the background colour).

Now, you can use the Colour picker tool to pick a colour from the drawing and fill it in another shape (closed area).

For example, pick a colour from a leaf, select the Fill with colour tool, and fill it in the background (white area).

2. MAGNIFIER TOOL

The Magnifier tool is used to zoom in and out on a part of the drawing.

Steps to Use the Magnifier Tool:

1. On the Home tab, in the Tools group, click on the Magnifier tool.
2. Move the magnifier and left-click to zoom in on the part of the drawing.

Note: Right-click the magnifier to zoom out on a drawing.

3. SELECTION TOOLS

Selection tools let you choose specific parts of your drawing to move, copy, resize, or rotate.

1) Rectangular Selection Tool: Selects a rectangular area.

- Go to the **Home** tab > **Image** group > **Select** >

Rectangular selection.

- Click and drag to select the area.

2) Free-Form Selection Tool: Selects an irregular area.

- Go to the **Home** tab > **Image** group > **Select** >

Free-form selection.

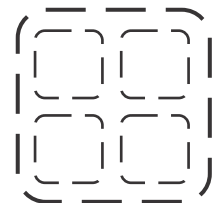

- Click and drag around the area you want to select.

3) Select All Tool: Selects the entire drawing.

- Go to the **Home** tab > **Image** group > **Select** >

Select All.

4) Moving the Selection

Select an area, bring the cursor inside the selection (it will change to four-sided arrows), and drag it to a new location.

5) Copy and Paste the Selection

Select the area, click Copy (in Clipboard group), then Paste. Move the pasted area to the desired location.

6) Cut and Paste the Selection

Select the area, click Cut (in Clipboard group), then Paste. Move the pasted area to the desired location.

7) Resizing the Selection

Drag the selection's corners to resize it or use the Resize option in the Image group for precise resizing.

4. ROTATE OR FLIP TOOL

Rotate or flip a drawing or selected area.

Steps to Rotate or Flip a Drawing:

1. Select the drawing.
2. Go to the **Home** tab > **Image** group > **Rotate**.
3. Choose an option, like Rotate right 90°.
