

UNIT 8

MS POWERPOINT

Learning Objectives

- Understand MS PowerPoint's use for creating presentations.
- Insert and organize slides with appropriate layouts.
- Add and customize images in slides.
- Apply transitions and themes for visual appeal.
- Practise navigating slides and creating simple presentations with text, images, and transitions.

UNIT 8

MS POWERPOINT

MICROSOFT POWERPOINT

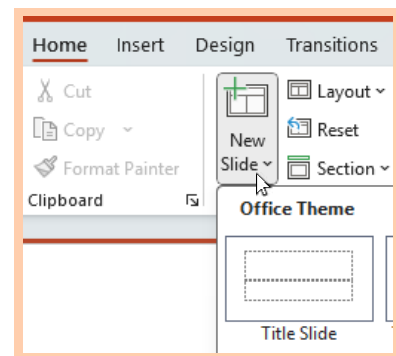

MS PowerPoint is a software that helps us create slideshows. We can use it to make presentations for school projects, stories, or any other information we want to share.

INSERTING A NEW SLIDE

To add a new slide in PowerPoint, follow these steps:

1. Open PowerPoint.
2. Click on "Blank Presentation" to start a new project.
3. Click on the "New Slide" button in the "Home" tab.
4. A menu will appear where you can choose different types of slides, like Title, Title and Content, or Blank.

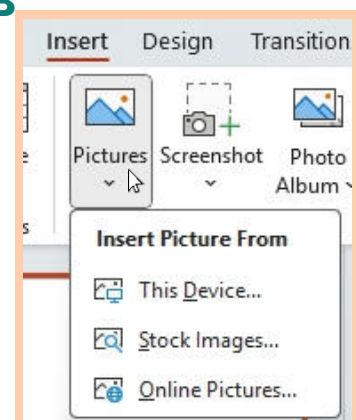

INSERTING PICTURES IN SLIDES

We can add pictures to our slides to make them more interesting. There are two ways to do this:

• METHOD 1: USING THE INSERT TAB

- . Open PowerPoint and start a new presentation.
- . Click on the "Insert" tab.
- . Click on "Pictures" and select "This Device" to choose a picture saved on your computer.

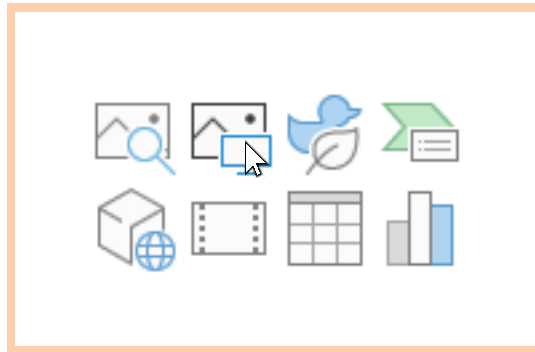

UNIT 8

MS POWERPOINT

. Browse your files, select the picture, and click "Insert."

- **METHOD 2: USING THE PICTURE ICON ON A SLIDE**

- . When creating a new slide, choose a layout with a picture icon.
- . Click the picture icon on the slide.
- . Select a picture from your computer or online and insert it.

RESIZING A PICTURE

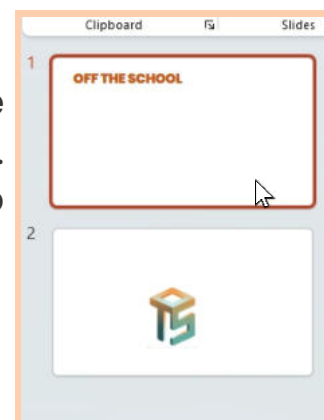

You can change the size of the picture by following these steps:

1. Click on the picture you want to resize.
2. Click and drag the small circles (dots) around the picture to make it bigger or smaller.
3. Release the mouse button to set the new size.

MOVING BETWEEN SLIDES

To switch between slides, click on the slide thumbnails on the left side of the screen. This helps you easily move from one slide to another while editing your presentation.

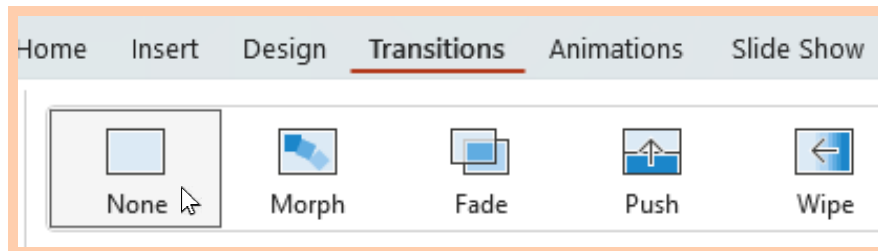

UNIT 8

MS POWERPOINT

ADDING TRANSITIONS BETWEEN SLIDES

1. **Open your presentation** and navigate to the slide where you want to add a transition.
2. Click on the **Transitions** tab in the ribbon. This tab displays a variety of transition effects like Fade, Push, Wipe, Split, Reveal, Random, and Morph. Here are some key options:

- **Morph**

This transition smoothly animates changes between two slides with similar layout elements.

- **Push**

Moves the old slide out as the new slide pushes in.

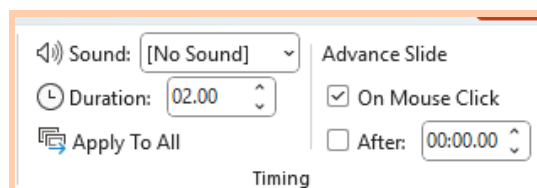

- **Wipe**

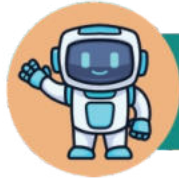

The new slide wipes over the old one from a specified direction.

3. **Choose a transition** by clicking on the desired effect. You can see a preview of the transition effect on your slide.

4. **Customize the transition:**

- **Effect Options:** This allows you to change how the transition occurs, like the direction of a Push or Wipe.
- **Duration:** Adjust how long the transition takes.
- **Sound:** Add a sound effect that plays during the transition.
- **Apply To All:** Apply the selected transition to all slides in your presentation.

EXERCISE 1

UNIT 8

MS POWERPOINT

Choose the correct answer.

1. What is the default file extension for PowerPoint presentations?

A .docx

B .pptx

C .xlsx

D .pdf

2. Which of the following keys is used to start a slideshow in PowerPoint?

A F1

B F5

C F12

D F3

3. Which tab is used to add transitions between slides in PowerPoint?

A Home

B Design

C Animations

D Transitions

4. Which feature in PowerPoint allows you to insert a pre-designed slide template?

A Slide Master

B Themes

C Layout

D Animations

5. What is the function of the 'Insert' tab in PowerPoint?

A To add new slides

B To apply a background

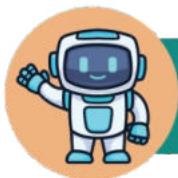

C To insert objects like pictures, charts, and tables

D To change the slide layout

UNIT 8

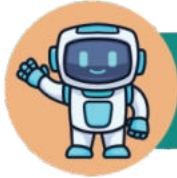

MS POWERPOINT

EXERCISE 2

Fill in the blanks.

1. To add a new slide, click on the _____ button in the Home tab.
2. The _____ tab allows you to insert pictures into your presentation.
3. We can make a picture larger by _____ it outwards using the dots around it.
4. _____ helps us create slideshows to show information.
5. We can move between slides by clicking on the slide _____ on the left.

EXERCISE 3

UNIT 8

MS POWERPOINT

Mark "True" or "False".

TRUE

FALSE

PowerPoint is used to create text documents.

☐☐

You can insert pictures into a PowerPoint slide.

☐☐

Slides are only used for school projects.

☐☐

You cannot change the size of a picture once it is added.

☐☐

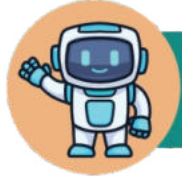

You can add multiple slides in a presentation.

☐☐

UNIT 8

MS POWERPOINT

EXERCISE 4

Answer the following questions.

1. What is MS PowerPoint used for?

Ans: _____

2. How can you insert a picture into a slide?

Ans: _____

3. What should you do if you want to make a picture bigger?

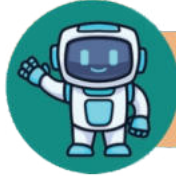

Ans: _____

4. What is the benefit of using different types of slides?

Ans: _____

5. How can you switch between slides while working on your presentation?

Ans: _____

LAB ACTIVITY

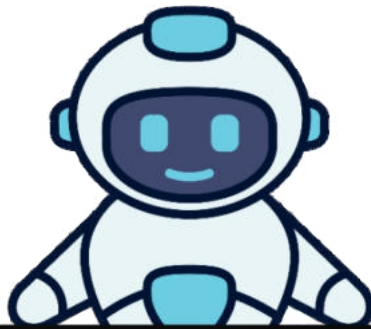

UNIT 8

MS POWERPOINT

CREATE A SIMPLE PRESENTATION

- Objective: Learn how to create a new presentation with 3 slides.

- **Steps:**

1. Open PowerPoint and start a new presentation.

2. Create three slides:

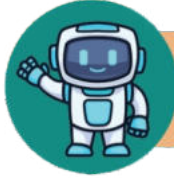

- **Slide 1:** Title slide with your name.
- **Slide 2:** Insert a picture of your favourite animal.
- **Slide 3:** Add text explaining why you like this animal.

3. Save your presentation as "My Presentation."

UNIT 8

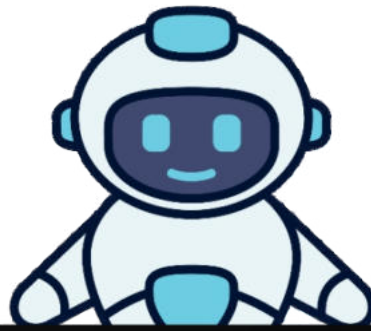

MS POWERPOINT

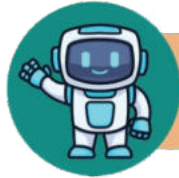

LAB ACTIVITY

INSERTING AND RESIZING PICTURES

- Objective: Practise inserting and resizing images.
- **Steps:**
 1. Open your saved presentation from **Activity 1**.
 2. On Slide 2, add another picture of an animal.
 3. Resize the picture to make it smaller than the first one.
 4. Save your work.

LAB ACTIVITY

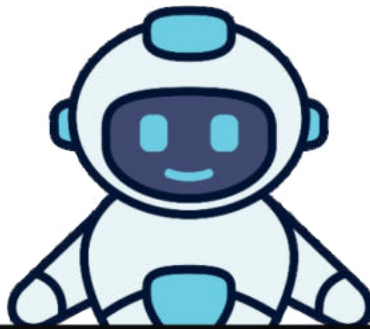

UNIT 8

MS POWERPOINT

CREATING A THEMED PRESENTATION

- Objective: Make a short presentation on a topic of interest.
- **Steps:**
 1. Open PowerPoint and start a new presentation.
 2. Choose a theme (e.g., "All About Cats or My Pet," "My Favourite Hobby," or "The Solar System").
 3. Create 4 slides, each with a different layout and content related to your theme.
 4. Insert at least two pictures and one piece of text in each slide.
 5. Practise switching between slides to review your presentation.
 6. Add Transitions between your slides.
