TIME

• Time

Time is measured in hours, minutes, and seconds. Clocks help us keep track of time with their hour, minute, and second hands.

• Time on a Clock:

Hour Hand: Moves slowly, completing one full rotation every 12 hours.

Minute Hand: Moves faster, completing one full rotation every hour.

Second Hand: Moves the fastest, completing one full rotation every minute.

• Converting Time

Seconds to Minutes

To convert seconds to minutes:

- Divide the number of seconds by 60 to get the equivalent in minutes.
- Alternatively, you can multiply the number of minutes by 60 to convert back to seconds.

$$\begin{array}{ccc} 60 & \div 60 & 1 \\ \text{SECONDS} & \longleftrightarrow & \text{MINUTE} \\ & \times 60 & \end{array}$$

Hours to Minutes

To convert hours to minutes:

- Multiply the number of hours by 60 to get the equivalent in minutes.

$$\begin{array}{l} \text{HOURS} \longrightarrow \text{MINUTES} \\ 1 \text{ HOUR} = 60 \text{ MINUTES} \end{array}$$

Convert 4 hours into minutes

$$\begin{array}{l} 4 \text{ HOURS} = 4 \times 60 \text{ MINUTES} \\ = 240 \text{ MINUTES} \end{array}$$

Minutes to Hours

To convert minutes to hours:

- Divide the number of minutes by 60 to get the equivalent in hours.

MINUTES $\longrightarrow$ HOURS

60 MINUTES = 1 HOUR

Convert 180 minutes into hours

60 MINUTES = 1 HOUR

1 MINUTE = $\frac{1}{60}$ HOURS

180 MINUTES = $180 \times \frac{1}{60}$ HOURS

= $\frac{180}{60}$ HOURS

= 3 HOURS

• **Convert the time between hours and minutes.**

1. 60 min = hr

2. 1 hr = min

3. 3 hr = min

4. 240 min = hr

5. 5 hr = min

6. 90 min = hr

7. 12 hr = min

8. 330 min = hr

9. 615 min = hr

10. 79 min = hr

11. 24 hr = min

12. 45 min = hr

- Calculate the sum or difference between each pair of times:

	hr	min
	13	34
+	25	25

	hr	min
	18	43
-	07	03

	hr	min
	12	04
+	13	41

	hr	min
	19	47
-	16	41

	hr	min
	04	43
+	16	36

	hr	min
	21	30
+	07	13

	hr	min
	16	39
-	09	57

	hr	min
	17	46
-	08	43
