

UNIT 6

WORKING WITH PRESENTATIONS

Learning Objectives

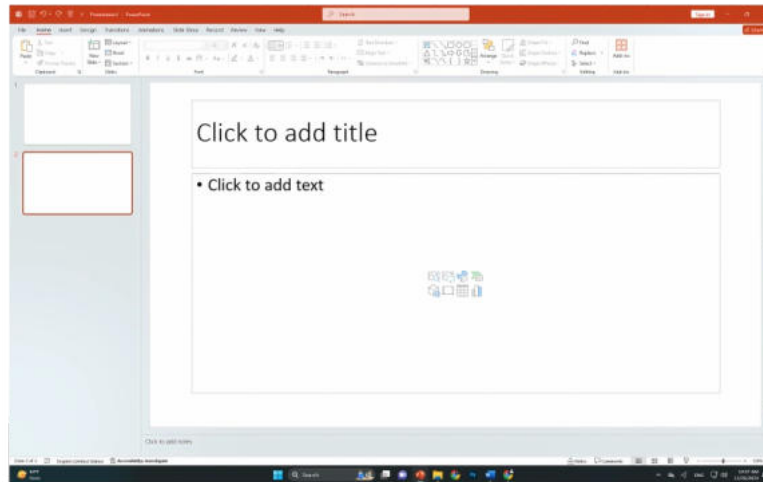

- Learn how to create, edit, and format presentations using MS PowerPoint.
- Understand the basics of adding slides, formatting text, and inserting objects.
- Develop skills in using different design layouts and transitions.

UNIT 6

WORKING WITH PRESENTATIONS

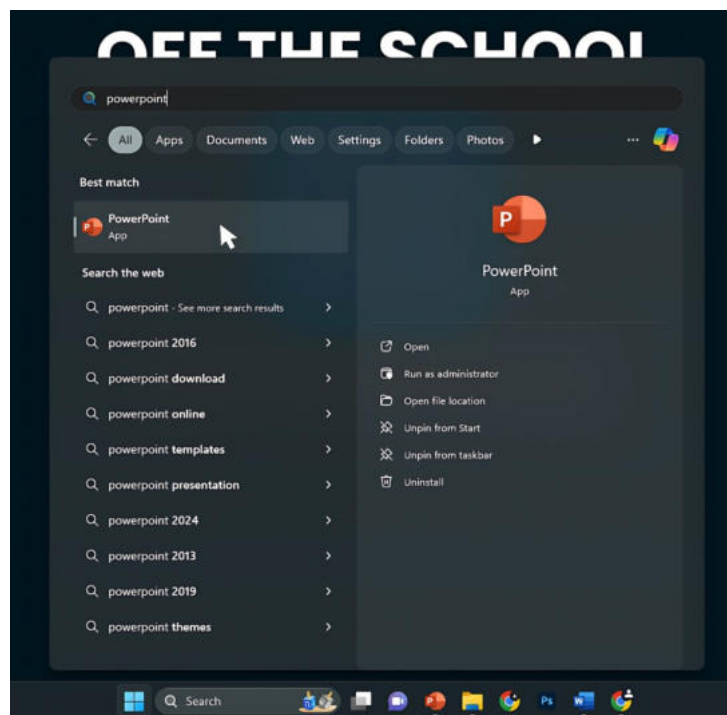

MS PowerPoint is a tool used to create presentations. A presentation is made up of multiple slides, where each slide can contain text, images, animations, and more. Presentations are used for delivering information visually in schools, businesses, or events.

HOW TO CREATE A PRESENTATION:

1. Open MS PowerPoint:

Open the MS PowerPoint application from your computer.

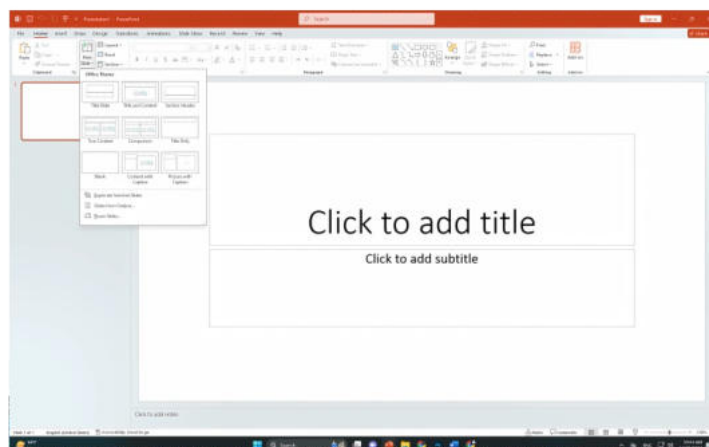

UNIT 6

WORKING WITH PRESENTATIONS

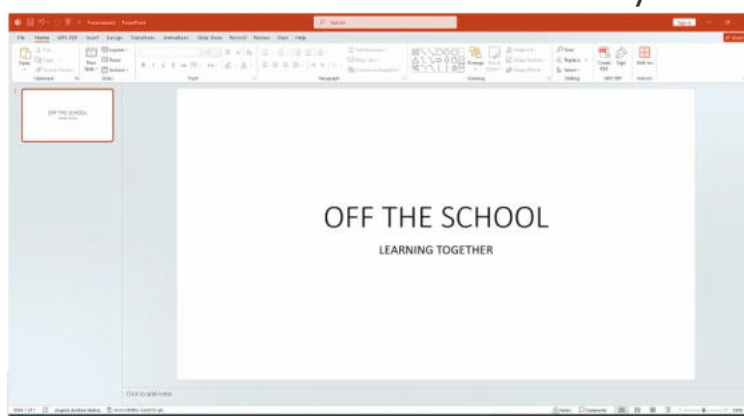

2. Create a New Slide:

Click on "New Slide" in the toolbar to add a blank slide to your presentation.

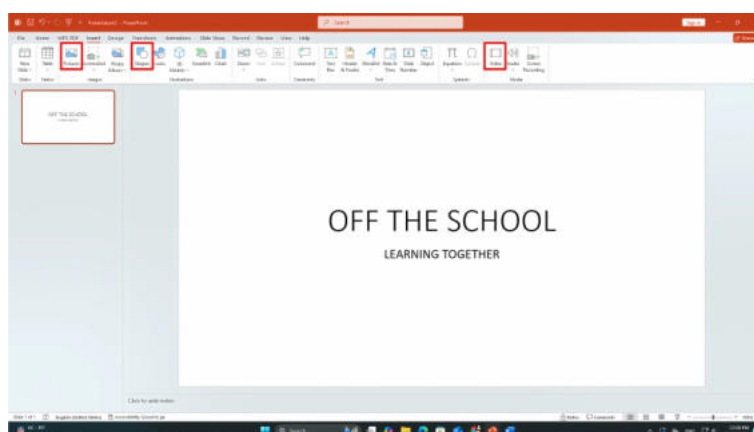

3. Add a Title and Text:

Each slide has different placeholders for titles and text. Click on the text box to write a title and content for your slide.

4. Inserting Images, Videos, and Shapes:

You can add visuals to make your presentation interesting. Click on the "Insert" tab to add pictures, shapes, or videos.

UNIT 6

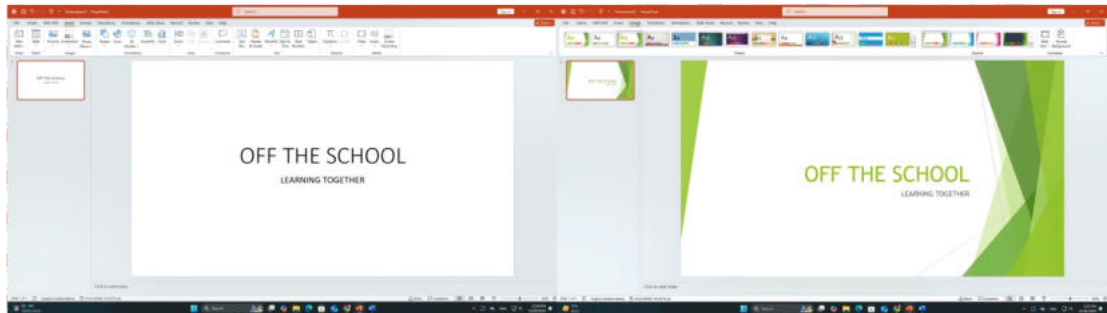

WORKING WITH PRESENTATIONS

5. Design and Layout:

Choose a design theme for your presentation by clicking on the Design tab. You can also change the layout of each slide by selecting the Layout option.

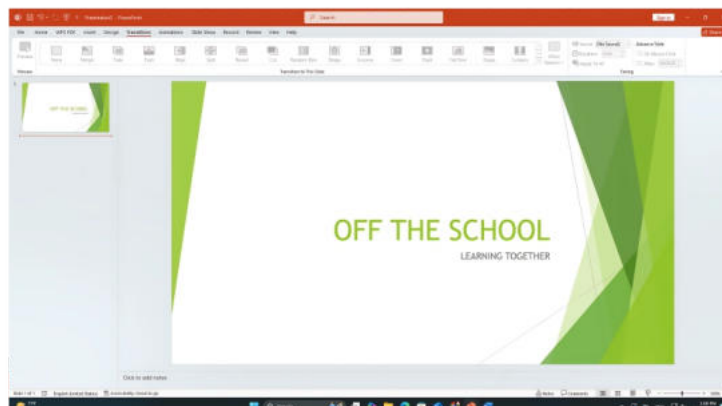

Before

After

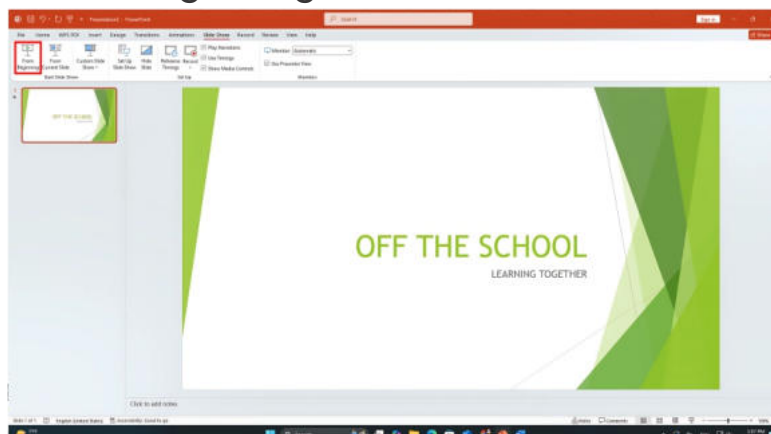

6. Adding Transitions and Animations:

You can make your slides more engaging by adding transitions between slides and animations to objects. Use the Transitions and Animations tabs to do this.

7. Saving and Running Your Presentation:

Save your presentation by clicking on the File tab and selecting Save As. To present, click on the Slideshow tab and choose From Beginning to run the slideshow.

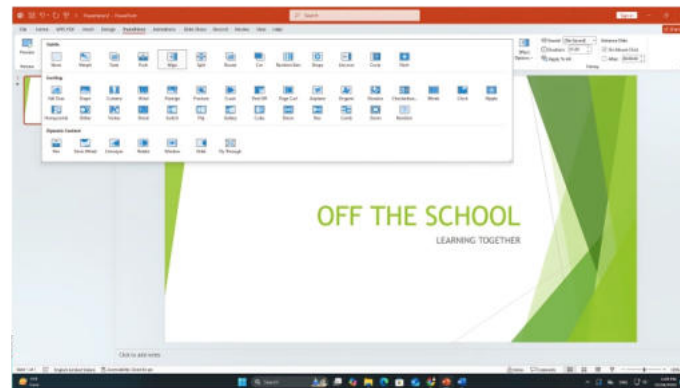

ADDING TRANSITIONS BETWEEN SLIDES

UNIT 6

WORKING WITH PRESENTATIONS

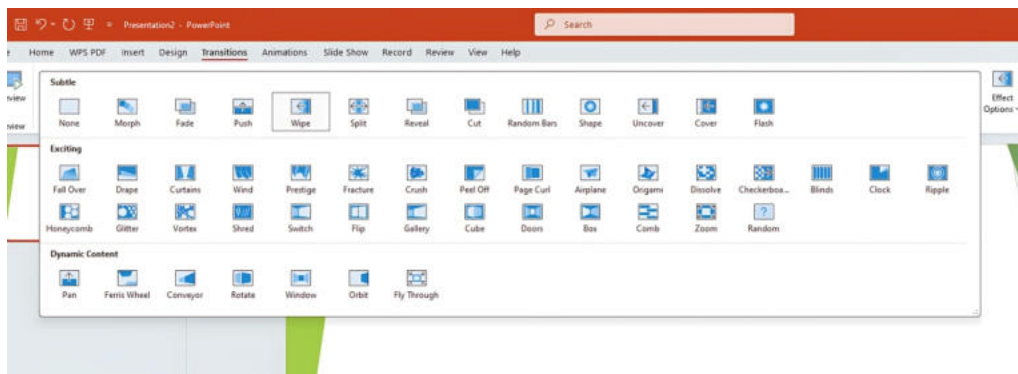

1. Open your presentation and navigate to the slide where you want to add a transition:

2. Click on the Transitions tab in the ribbon:

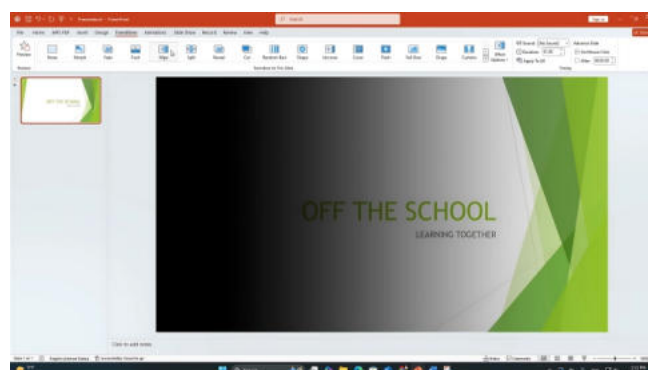

This tab displays a variety of transition effects like Fade, Push, Wipe, Split, Reveal, Random, and Morph.

- **Morph:** This transition smoothly animates changes between two slides with similar layout elements.
- **Push:** Moves the old slide out as the new slide pushes in.
- **Wipe:** The new slide wipes over the old one from a specified direction.

3. Choose a transition by clicking on the desired effect.

You can see a preview of the transition effect on your slide.

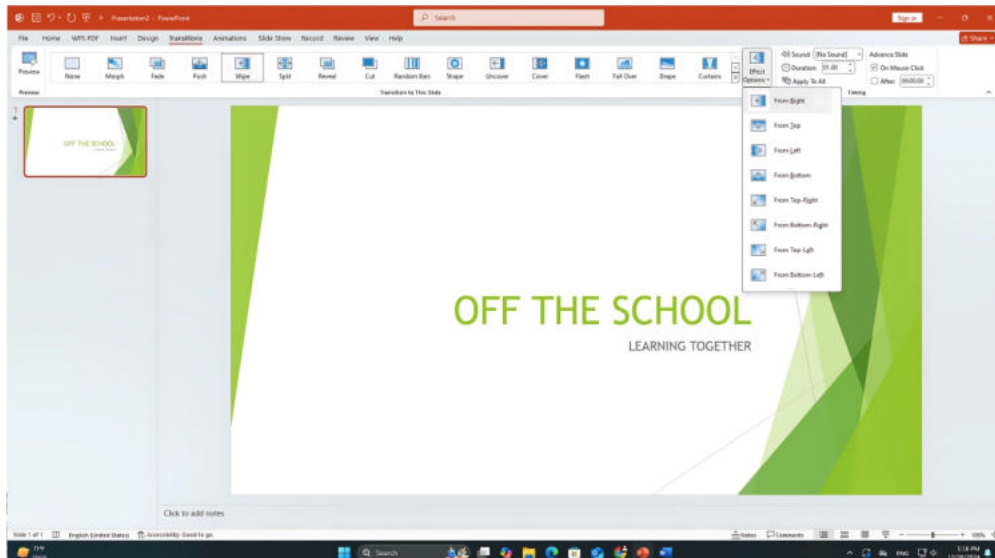

UNIT 6

WORKING WITH PRESENTATIONS

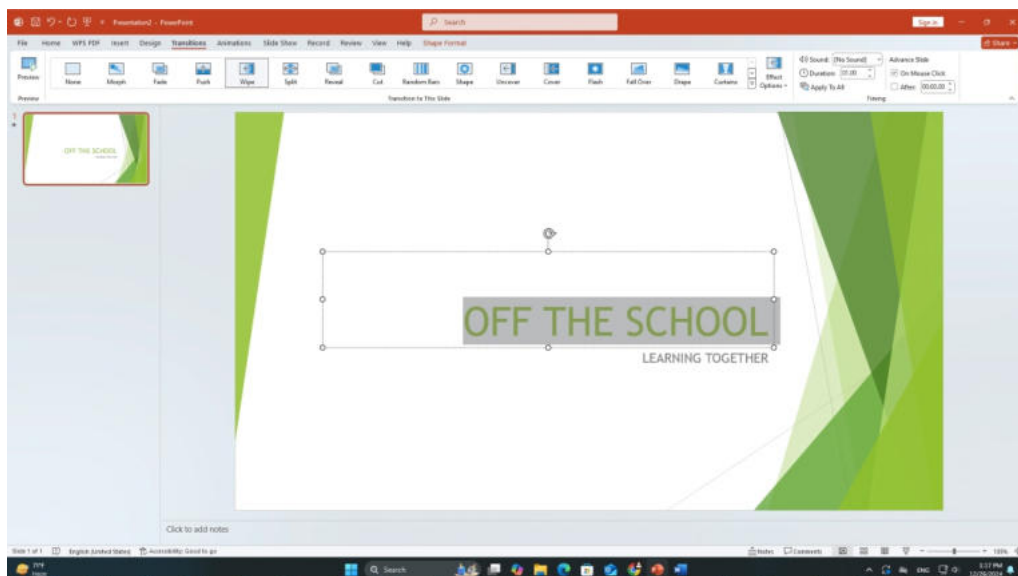

4. Customize the transition:

- **Effect Options:** Change how the transition occurs, like the direction of a Push or Wipe.
- **Duration:** Adjust how long the transition takes.
- **Sound:** Add a sound effect that plays during the transition.
- **Apply To All:** Apply the selected transition to all slides in your presentation.

ADDING ANIMATIONS TO OBJECTS

1. Select the object (text box, image, shape, etc.) on your slide that you want to animate.

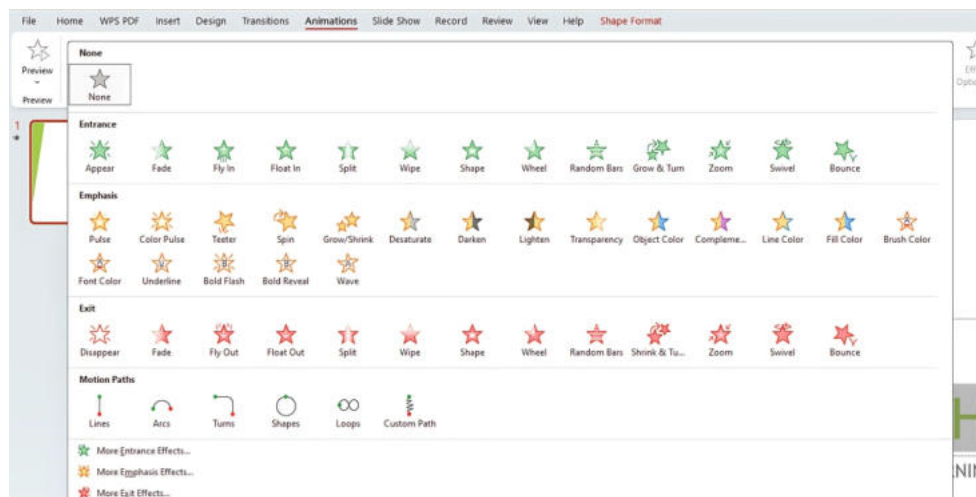

UNIT 6

WORKING WITH PRESENTATIONS

2. Click on the Animations tab in the ribbon:

This tab includes various animation effects categorized under:

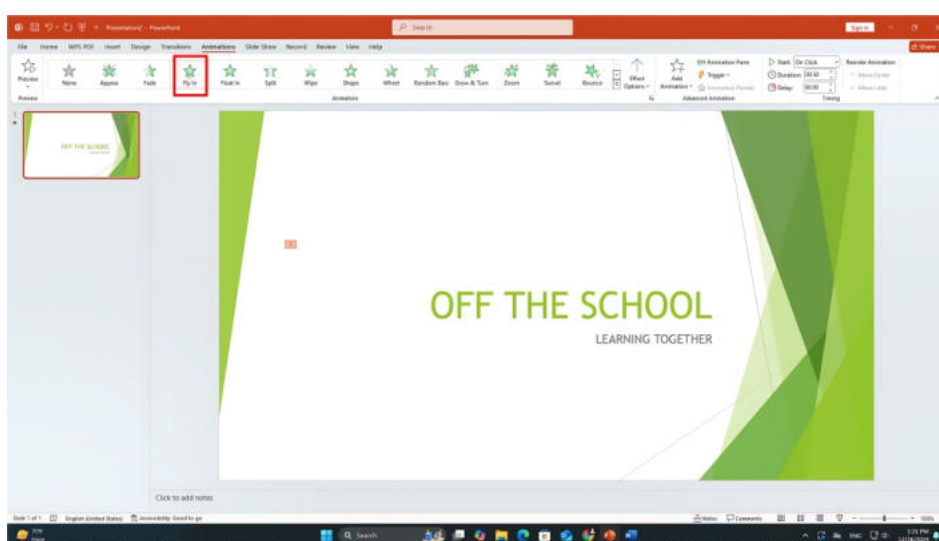

- **Entrance:** Effects that bring objects onto the slide (e.g., Fade, Fly In, Float In).

- **Emphasis:** Effects that highlight objects already visible (e.g., Pulse, Spin, Grow/Shrink).
- **Exit:** Effects that remove objects from the slide (e.g., Fade Out, Fly Out).
- **Motion Paths:** Create a path that the object follows on the slide.

3. Select an animation by clicking on the desired effect:

Preview it directly on the slide.

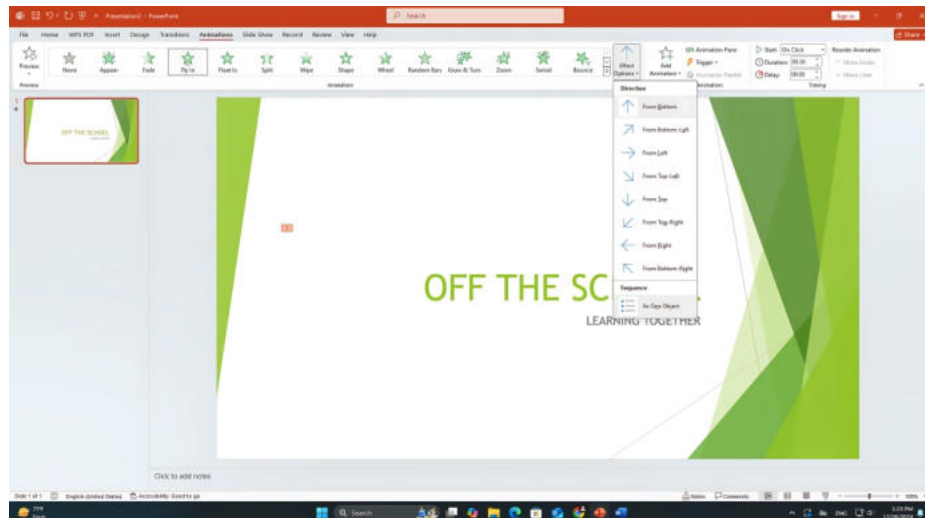

UNIT 6

WORKING WITH PRESENTATIONS

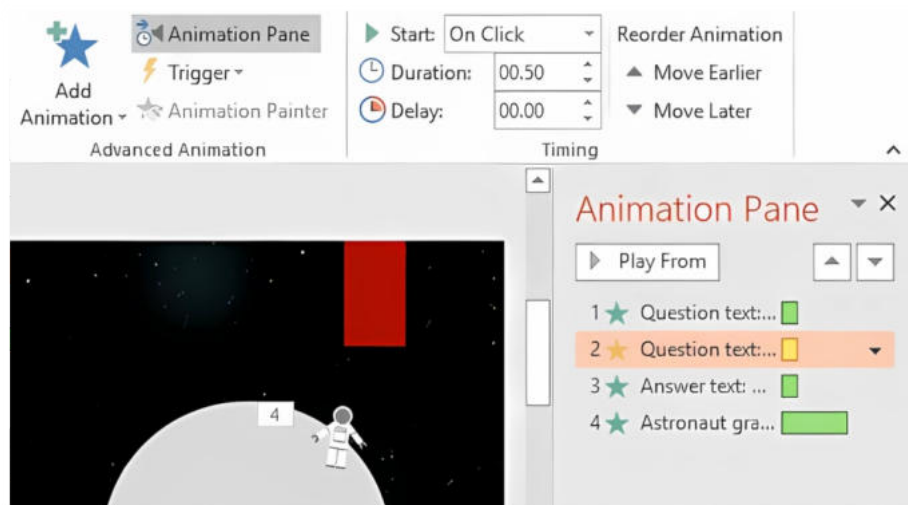

4. Customize the animation:

- **Effect Options:** Modify how the animation behaves (direction, intensity, etc.).
- **Start:** Choose how the animation starts: On Click, With Previous, or After Previous.
- **Duration:** Adjust how long the animation takes to complete.
- **Delay:** Set a delay before the animation starts after it's triggered.

5. Animation Pane:

Open the Animation Pane from the Animations tab to see a list of all animations on the current slide. You can reorder, modify, or remove animations here.

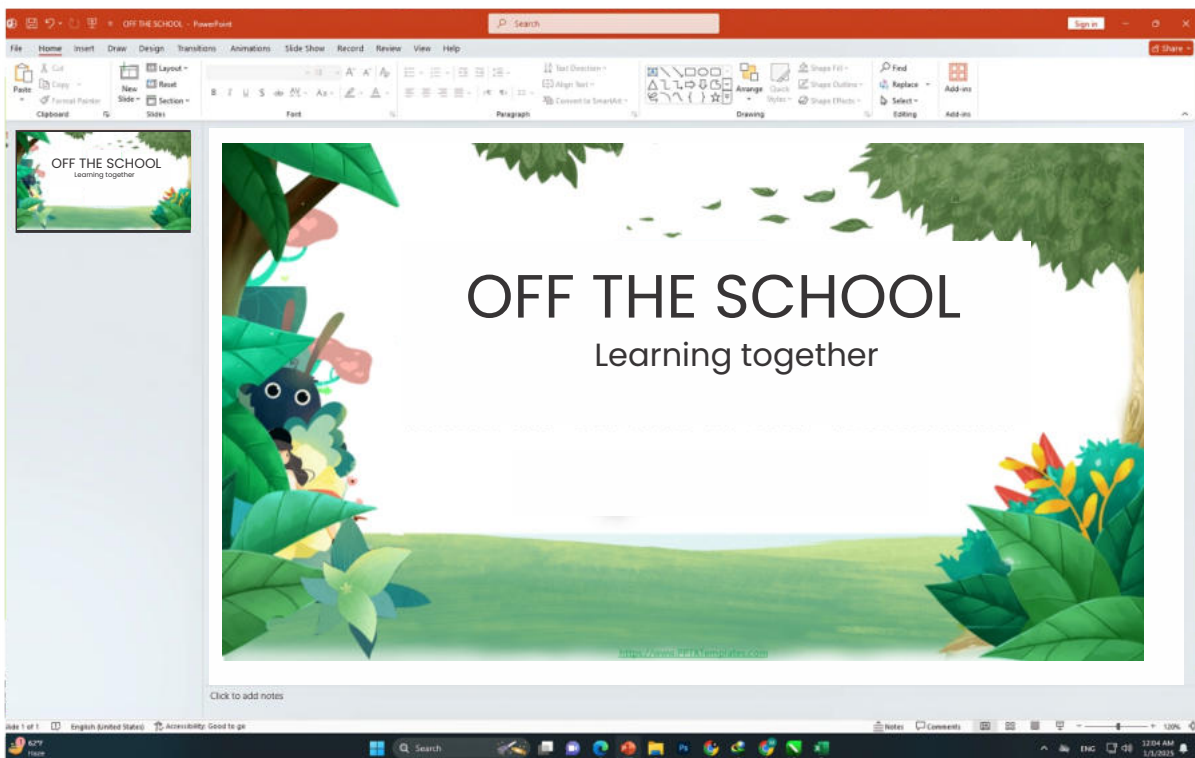

TIPS FOR USING TRANSITIONS AND ANIMATIONS

- **Keep it professional:** Overusing animations and transitions can distract from your message. Use them to enhance your presentation, not overshadow it.
- **Test your presentation:** Always preview your slides with the transitions and animations to ensure they function as expected and look professional.

UNIT 6

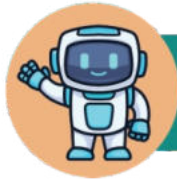

WORKING WITH PRESENTATIONS

UNIT 6

WORKING WITH PRESENTATIONS

EXERCISE 1

Circle the correct answer.

1. What is a presentation made up of in MS PowerPoint?

A

Documents

B

Slides

C

Charts

D

Pages

2. Which tab is used to insert pictures or shapes in MS PowerPoint?

A

Design

B

Home

C

Insert

D

Slideshow

3. What is the purpose of transitions in a presentation?

A

To add text

B

To move between slides smoothly

C

To insert pictures

D

To save the presentation

4. Which tab is used to apply different slide designs or themes in PowerPoint?

A

Home

B

Design

C

Review

D

Animations

5. Which feature allows you to apply effects to text and objects in MS PowerPoint?

A

Transitions

B

Animations

C

Slide Layout

D

Outline View

UNIT 6

WORKING WITH PRESENTATIONS

6. Which shortcut key is used to start the slideshow from the beginning?

A

F1

B

F5

C

Ctrl + S

D

F12

7. Where can you add notes for each slide to help during a presentation?

A

In the Notes Pane

B

In the Outline View

C

In the Slide Master

D

In the Animation Pane

8. What is the maximum zoom percentage you can set in MS PowerPoint?

A

100%

B

200%

C

400%

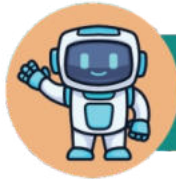

D

500%

UNIT 6

WORKING WITH PRESENTATIONS

EXERCISE 2

Mark "True" or "False".

TRUE

FALSE

You can only add text to a PowerPoint slide, not pictures.

☐☐

The Design tab allows you to change the theme of your presentation.

☐☐

PowerPoint presentations can only contain one slide.

☐☐

You can insert audio and video files into a PowerPoint presentation.

☐☐

The Save option in MS PowerPoint automatically saves your presentation as a video.

☐☐

You cannot apply different layouts to different slides in a presentation.

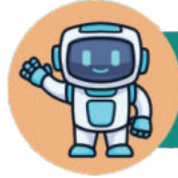

☐☐

Animations in PowerPoint are used to add special effects to text and objects.

☐☐

PowerPoint does not allow you to print handouts of your slides.

☐☐

EXERCISE 3

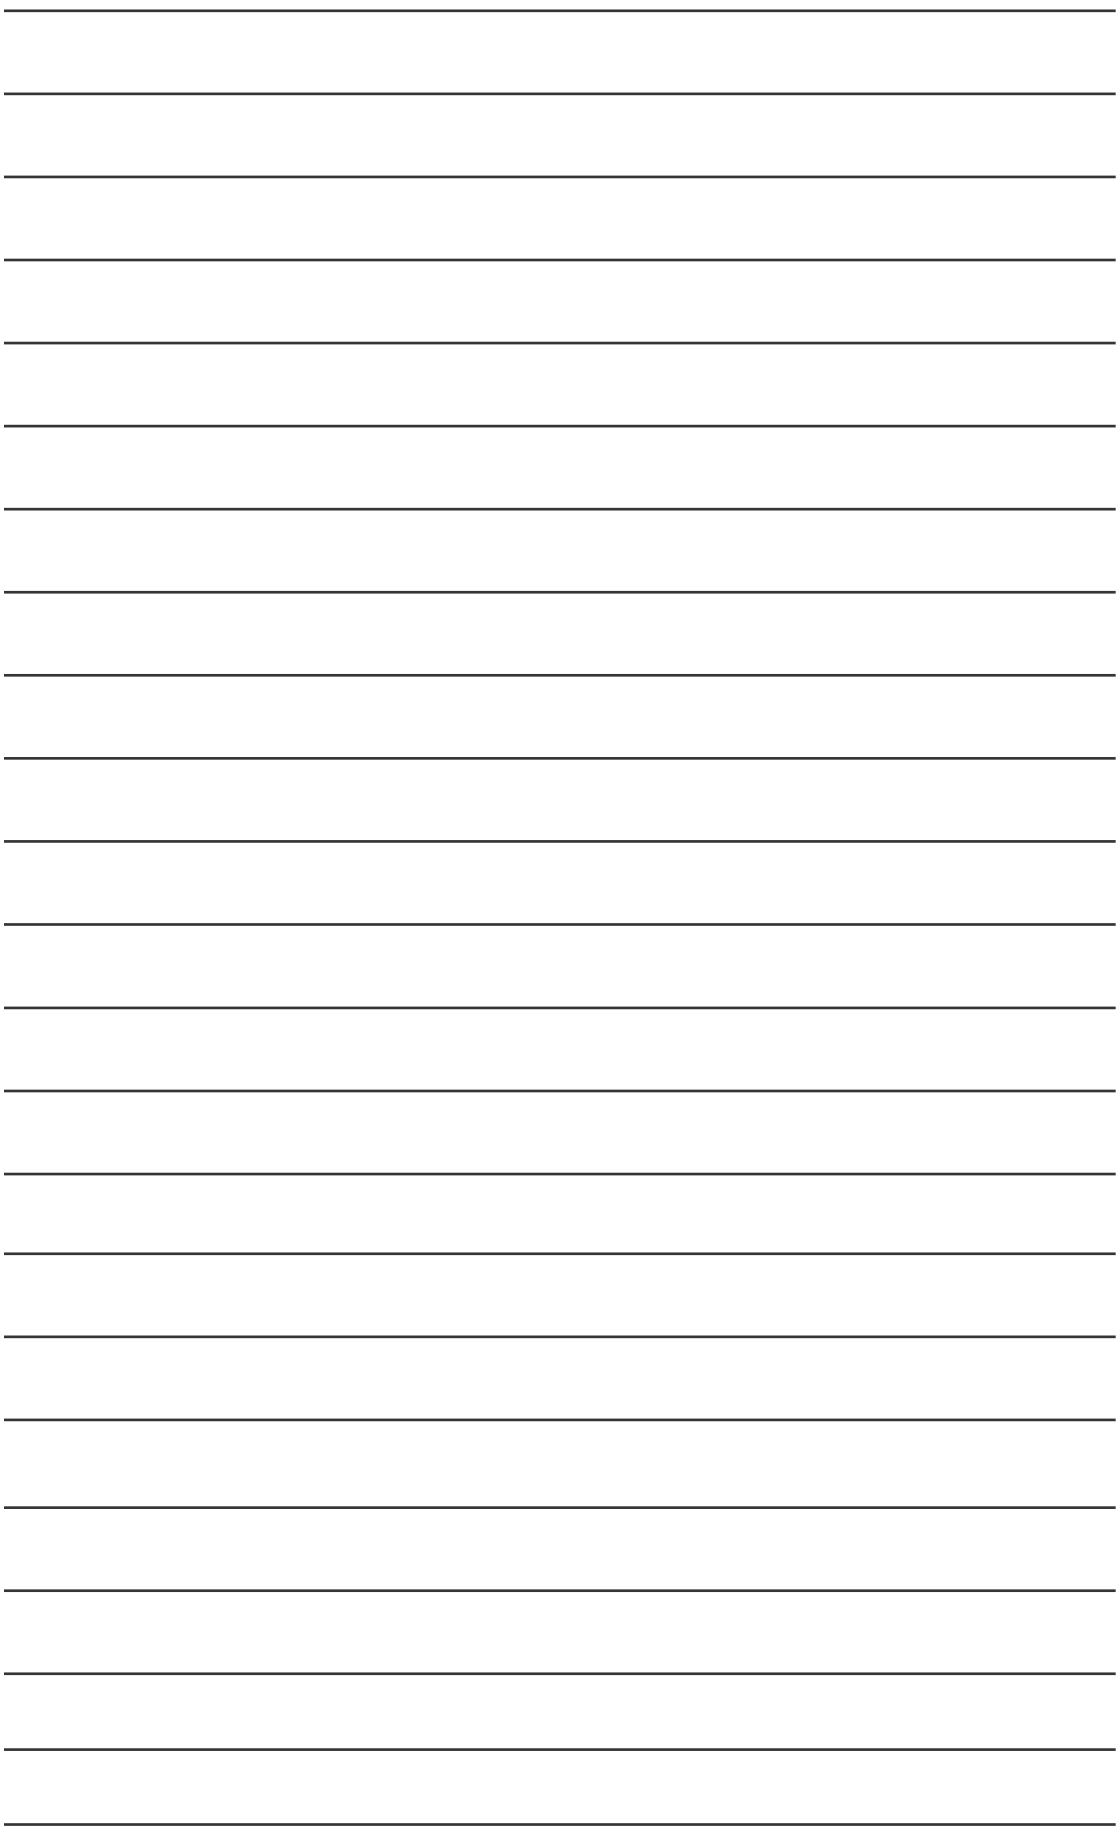

UNIT 6

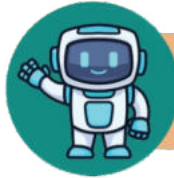

WORKING WITH PRESENTATIONS

Answer the following questions:

- 1. What is a presentation in MS PowerPoint?**
- 2. How can you add a new slide to your presentation?**
- 3. What is the purpose of using transitions in a presentation?**
- 4. Which shortcut key is used to start the slideshow from the beginning?**
- 5. Which tab is used to apply different slide designs or themes in PowerPoint?**

WORKING WITH PRESENTATIONS

LAB ACTIVITY

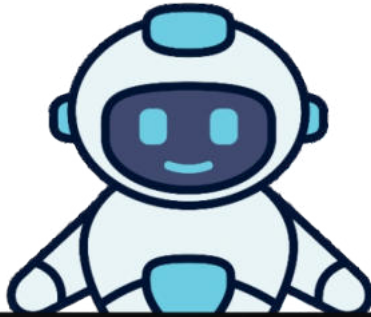

UNIT 6

WORKING WITH PRESENTATIONS

**CREATE A PRESENTATION ON THE TOPIC
"MY FAVOURITE ANIMAL" USING 3 SLIDES.**

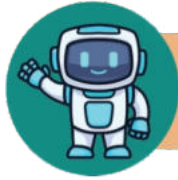

Steps:

1. Open MS PowerPoint and create a new presentation.
2. On Slide 1, add a title and your name.
3. On Slide 2, add a picture of your favourite animal and write 3 facts about it.
4. On Slide 3, use a different layout and write why you like that animal.
5. Add transitions between the slides and save your presentation.

UNIT 6

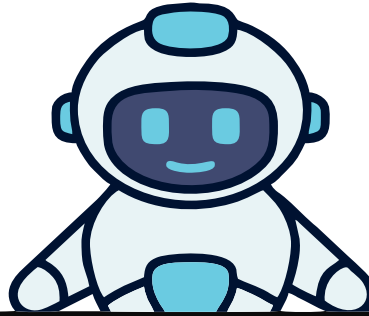

WORKING WITH PRESENTATIONS

LAB ACTIVITY

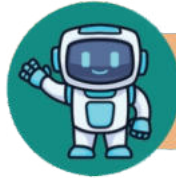

CREATE A 4-SLIDE PRESENTATION ON THE SOLAR SYSTEM, HIGHLIGHTING KEY PLANETS.

Steps:

1. Open MS PowerPoint and start a new presentation.
2. On Slide 1, add a title slide with the heading "The Solar System" and your name.
3. On Slide 2, insert a picture of the Sun and write 2 facts about it.
4. On Slide 3, add a picture of the Earth and write 2 interesting facts about Earth.
5. On Slide 4, add a picture of Mars and mention why it is known as the "Red Planet."
6. Add transitions between slides and save your presentation.

LAB ACTIVITY

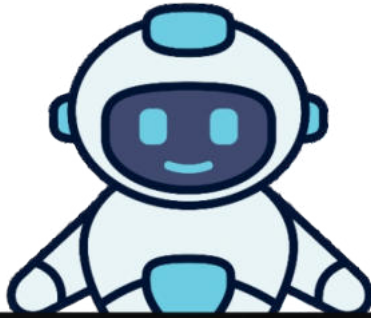

UNIT 6

WORKING WITH PRESENTATIONS

CREATE A 3-SLIDE PRESENTATION ABOUT A VACATION SPOT YOU'D LOVE TO VISIT.

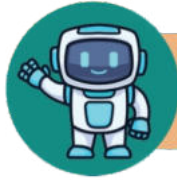

Steps:

1. Open MS PowerPoint and create a new presentation.
2. On Slide 1, add the title "My Dream Vacation" and your name.
3. On Slide 2, insert an image of the vacation spot and describe why you chose it.
4. On Slide 3, list 3 activities you would like to do at that location.
5. Apply different transitions between the slides and save your presentation.

UNIT 6

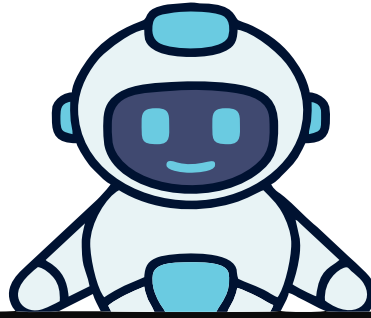

WORKING WITH PRESENTATIONS

LAB ACTIVITY

CREATE A 4-SLIDE PRESENTATION ABOUT THE IMPORTANCE OF HEALTHY EATING.

Steps:

1. Open MS PowerPoint and start a new presentation.
2. On Slide 1, add the title "Healthy Eating Habits" and your name.
3. On Slide 2, include a picture of healthy foods and write about why eating vegetables and fruits is important.
4. On Slide 3, list 3 benefits of drinking water daily.
5. On Slide 4, write 2 tips on how to maintain a balanced diet.
6. Add transitions between the slides and save your presentation.
