● **Comparison of 6-Digit Numbers**

- Check from Left to Right:

● **Start comparing the leftmost (6th) digit.**

- Example: **308,990** > **299,789** because **3** > **2**.

- If the digits are Equal:

● **Move to the next digit on the right.**

- Example: **786,995** < **790,012** because **8** < **9**.

● **Continue Comparing:**

- Compare each digit in order until a difference is found.
- The number with the higher digit first is greater.
