VOLUME AND CAPACITY

● Volume and Capacity

Volume and Capacity measure how much liquid a container can hold.

● Common Units:

1 litre (l) = 1,000 millilitres (ml).

Millilitres are used for small quantities, and litres for larger quantities.

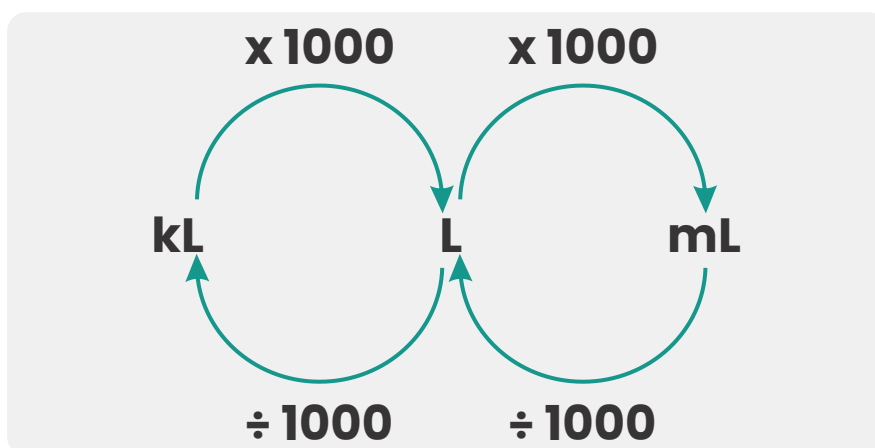

● Conversions

1) To convert litres to millilitres: Multiply by 1,000.

Example: $2\text{ l} = 2 \times 1,000 = 2,000\text{ ml}$.

2) To convert millilitres to litres: Divide by 1,000.

Example: $500\text{ ml} = 500 \div 1,000 = 0.5\text{ l}$.

VOLUME AND CAPACITY

● Conversions.

1) Convert **3** litres to millilitres = _____

2) Convert **1,250** millilitres to litres = _____

3) Convert **5.5** litres to millilitres = _____

4) Convert **750** milliliters to litres= _____

5) Convert **9** litres to millilitres = _____

6) Convert **4,500** millilitres to litres= _____

7) Convert **10** litres to millilitres = _____

8) Convert **3,250** millilitres to litres= _____

9) Convert **7** litres to millilitres = _____

10) Convert **6,750** millilitres to litres= _____

11) Convert **8** litres to millilitres = _____

12) Convert **2,750** millilitres to litres = _____

- **Addition of Volume**

Steps to Add Volumes:

- 1) Write litres and millilitres in columns.
- 2) Add the millilitres first.
- 3) If the total millilitres exceed 1,000, carry over to litres.

- **Add the following.**

1) 17 l 826 ml + 23 l 578 ml = _____.

2) 46 l 950 ml + 39 l 475 ml = _____.

3) 12 l 345 ml + 14 l 789 ml = _____.

4) 22 l 510 ml + 18 l 430 ml = _____.

5) 33 l 920 ml + 12 l 680 ml = _____.

VOLUME AND CAPACITY

6) $7\text{ l } 825\text{ ml} + 15\text{ l } 500\text{ ml} = \underline{\hspace{2cm}}$.

7) $45\text{ l } 740\text{ ml} + 34\text{ l } 260\text{ ml} = \underline{\hspace{2cm}}$.

8) $8\text{ l } 960\text{ ml} + 3\text{ l } 540\text{ ml} = \underline{\hspace{2cm}}$.

9) $25\text{ l } 300\text{ ml} + 40\text{ l } 780\text{ ml} = \underline{\hspace{2cm}}$.

10) $14\text{ l } 110\text{ ml} + 6\text{ l } 890\text{ ml} = \underline{\hspace{2cm}}$.

11) $36\text{ l } 400\text{ ml} + 27\text{ l } 600\text{ ml} = \underline{\hspace{2cm}}$.

12) $9\text{ l } 725\text{ ml} + 4\text{ l } 175\text{ ml} = \underline{\hspace{2cm}}$.

● Subtraction of Volume

Steps to Subtract Volumes:

- 1) Write litres and millilitres in columns.
- 2) If millilitres in the top row are smaller, borrow 1 litre (convert to 1,000 ml).

- Subtract the following

1) **47 l 80 ml - 16 l 0 ml =** _____.

2) **93 l 55 ml - 61 l 40 ml =** _____.

3) **92 l 92 ml - 71 l 31 ml =** _____.

4) **36 l 67 ml - 22 l 35 ml =** _____.

5) **54 l 95 ml - 21 l 70 ml =** _____.

6) **36 l 39 ml - 25 l 8 ml =** _____.

7) **15 l 500 ml - 6 l 250 ml =** _____.

8) **75 l 800 ml - 42 l 600 ml =** _____.

9) **50 l 100 ml - 25 l 700 ml =** _____.

10) **62 l 900 ml - 34 l 450 ml =** _____.

• Word Problems

Q1: Jug A has 45 l 670 ml of orange juice, and Jug B has 67 l 890 ml of apple juice. What is the total juice?

Q2: Arif sells 35 l 800 ml of milk in the morning and 24 l 500 ml in the evening. How much milk does he sell in a day?

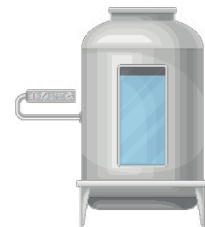

Q3: Sara buys 500 ml of mustard oil, 250 ml of coconut oil, and 2 l of refined oil. What is the total quantity of oil?

Q4: A tank contains 478 l 360 ml of water. After using 239 l 125 ml. How much water is left?

VOLUME AND CAPACITY

Q5: Maria has 2 l of oil. How many 250 ml bottles can she fill?

Q6: A bucket holds 25 l 750 ml of water. Another bucket has 13 l 480 ml. How much more water does the first bucket hold?
