

UNIT 7

MULTIMEDIA AND ANIMATION IN MS POWERPOINT

Learning Objectives

- Enhance slides by adding and adjusting multimedia elements.
- Apply advanced transitions and animations for dynamic presentation.
- Understand when to use animations to keep the audience engaged.

Multimedia, transitions, and animations add visual appeal and engage your audience. In this chapter, you'll learn to insert images, videos, and audio, and create custom animations to make your presentations come alive.

Adding and Adjusting Multimedia

Inserting and Formatting Images:

1. Insert Images:

- Click on the **Insert** tab, select **Pictures**, and choose an image from your device.

2. Format Images:

- Use options under the **Picture Format** tab to add borders, effects, or make the image partially transparent.

3. Cropping and Removing Backgrounds:

- To crop, select **Crop** from the Picture Format tab.
- To remove the background, choose **Remove Background** and adjust the areas to keep or discard.

Embedding Videos and Audio Clips:

1. Adding Videos:

- Go to the **Insert** tab, select **Video**, and pick either
- **This Device** (for files on your computer) or **Online Video**.
- Adjust playback options by right-clicking the video, choosing **Playback**, and setting it to play automatically or on click.

2. Adding Audio:

- Select **Insert** > **Audio** > **Audio on My PC** to insert a sound file.
- Use audio playback settings to adjust volume and timing, such as fade in or fade out.

Advanced Transitions and Animations

Applying Transitions to Slides:

1. Select a Transition:

- Go to the **Transitions** tab and pick an effect like **Morph**, **Push**, or **Wipe**.

2. Customize the Transition:

- Use **Effect Options** to choose the direction or style, **Duration** to set speed, and **Sound** to add an audio cue.

3. Apply to All Slides:

- Select **Apply to All** if you want the same transition across your presentation.

Animating Objects on Slides:

1. Choose an Animation Type:

- Go to the **Animations** tab, and select animations under **Entrance**, **Emphasis**, **Exit**, or **Motion Paths**.

2. Animation Settings:

- Use **Effect Options** to change direction or style.
- Choose **Start** options: **On Click**, **With Previous**, or **After Previous** for the timing.

3. Using the Animation Pane:

- Open the **Animation Pane** to see all animations on the slide. You can adjust order, duration, or add delays.

Tips for Using Transitions and Animations:

- Use animations to highlight important information but avoid overuse. Stick to one or two types of transitions for consistency.
- Preview animations to ensure they enhance, not distract from, your presentation.

Practical Activity

1. Open a presentation and add two images and a video.
2. Apply a transition effect to each slide.
3. Choose an animation effect for at least two objects, adjusting timing and order.
4. Practise presenting, using animations and transitions to emphasize key points.

EXERCISES

01: Choose the correct answer.

1. Which tab in MS PowerPoint lets you change the overall look of the presentation by choosing a design theme?

- a) Insert
- b) Design
- c) Slide Show
- d) Review

2. What is a Slide Master used for?

- a) To add animations to objects
- b) To set a consistent layout and design across all slides
- c) To insert videos into a presentation
- d) To apply transitions

3. Where do you go to add a new slide to your presentation?

- a) Home tab
- b) Slide Master view
- c) Design tab
- d) Insert tab

4. Which of the following is an Entrance animation effect?

- a) Fade
- b) Spin
- c) Grow/Shrink
- d) Float In

5. What does the Animation Pane allow you to do?

- a) Apply a theme to all slides
- b) Set timing and order of animations on a slide
- c) Insert shapes and images
- d) Apply transitions to all slides

6. Which option under the Transitions tab allows you to add a sound effect to a transition?

- a) Effect Options
- b) Duration
- c) Apply to All
- d) Sound

7. To remove the background of an image, which tool should you use?

- a) Crop
- b) Format Painter
- c) Remove Background
- d) Transparency

8. What is the purpose of sections in a presentation?

- a) To add multimedia files
- b) To organize slides into groups
- c) To change slide layouts
- d) To create animations

9. Which option allows you to preview a transition effect before applying it?

- a) Slide Master
- b) View tab
- c) Preview button in the Transitions tab
- d) Animation Pane

10. In MS PowerPoint, which view allows you to see the entire slide layout and structure of the presentation?

- a) Slide Show view
- b) Slide Sorter view
- c) Presenter view
- d) Master view

02: Fill in the blanks.

1. The _____ tab is used to insert images, videos, shapes, and other objects into a presentation.
2. _____ is a feature that allows you to apply the same layout to all slides in the presentation.
3. _____ animations are used to make objects appear on the slide.
4. _____ helps you organize slides by dividing them into groups, making larger presentations easier to manage.
5. The _____ tab allows you to adjust the playback settings of audio or video files.

03: Write True or False for each statement.

	TRUE	FALSE
Using too many animations in a presentation can make it look unprofessional.	☐	☐
The Animation Pane helps you add new slides to your presentation.	☐	☐
The Morph transition effect can make objects move smoothly between slides.	☐	☐
To change the background colour on all slides, you need to edit the Slide Master.	☐	☐
The Animation Pane only shows animations for text boxes.	☐	☐

04: Answer the following questions.

1. What is the purpose of using a Slide Master in MS PowerPoint?
2. How can sections help you in a large presentation?
3. Name two effects available under the Animations tab and describe their purposes.
4. What should you keep in mind when using transitions and animations in a presentation?
5. How do you add a sound effect to a transition?

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and extend across the width of the page. There are no margins, text, or other markings on the paper.

This image shows a single page of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page, leaving small margins at the top and bottom. There are no vertical margin lines, and the paper is completely blank except for the lines.

LAB ACTIVITIES

Lab Activity 1: Inserting and Formatting Images with Advanced Options

Objective: To learn how to enhance images with formatting tools.

Instructions: Insert an image on a slide, then use the **Picture Format** tab to add a border, shadow, and apply a colour effect. Crop the image to focus on the main subject and adjust transparency. Save the slide and present it, explaining the choices made in formatting.

Lab Activity 2: Embedding a Video with Playback Controls

Objective: To insert a video and adjust playback settings.

Instructions:

Find a short video file and insert it on a slide. Use the **Playback** tab to set the video to start automatically when the slide is shown, loop the video, and adjust the volume. Practise presenting the slide, noting how the video plays as expected.

Lab Activity 3: Applying and Customizing Transitions

Objective: To understand and experiment with different transition effects.

Instructions: Create a small presentation of four slides. Apply a different transition effect to each slide (e.g., Fade, Push, Wipe, Morph).

Use **Effect Options** to change the transition direction or style, and set varying **Duration** times. Present the slides to the class to demonstrate each effect.

Lab Activity 4: Animating Objects with Sequenced Animations

Objective: To create a sequence of animations that happen in order.

Instructions:

On one slide, add three objects: a title, an image, and a bullet list. Apply a different animation effect to each item (Entrance, Emphasis, and Exit).

Use the **Animation Pane** to sequence the animations so they appear in the order you want. Practice presenting the slide and discuss how the sequence adds engagement.
