

Glossary

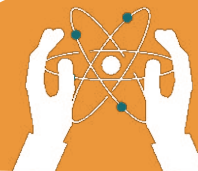

UNIT NO 1: PLANTS AND PHOTOSYNTHESIS

WORDS	MEANINGS
Essential	Necessary, extremely important.
Photosynthesis	Photo means light, synthesis means to make.
Glucose	Form of sugar which plants make through the process of photosynthesis.
Stomata	Openings present on leaves.
Nutrients	Any substance that plant and animal need to live and grow.

UNIT NO 2: FLOWERING AND NON FLOWERING PLANT

WORDS	MEANINGS
Reproduction	The process of producing offspring of same species.
Germination	The period, in which seed starts to develop itself into next stage.
Pollen	Powder produced by plants when they reproduce.
Dispersal	Movement of seeds from one place to another.
Damp	Wet in nature.

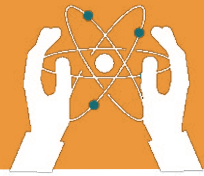

GLOSSARY

Fertilization	The process in which eggs or seed start to develop.
Logging	Cutting of trees.
Soil Erosion	Removal of soil particles by air ,water.

UNIT NO 3: LIFE CYCLE OF HEN AND FISH

WORDS	MEANINGS
Favourable	Right or suitable.
Development	The result of developing.
Embryo	An initial stage of development.
Clutches	A group of eggs laid together.
Incubation	The condition in which birds keep eggs warm until their youngs come out.
Hatch	The act of producing young from an egg.
Juvenile	The one who is not mature enough to called as adult.
Larva	Immature, wingless.

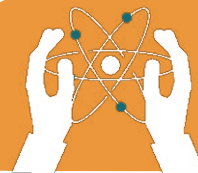

UNIT NO 4: FOOD CHAIN

WORDS	MEANINGS
Energy	Power to do work.
Food Chain	Organisms placed into order from source to dependence.
Producers	Those that create their own food through photosynthesis.
Consumers	Those who rely on others for food.
Decomposers	Those that break dead organic matter and get nutrition from it.

UNIT NO 5: VIRUSES, BACTERIA AND FUNGI

WORDS	MEANINGS
Microorganism	Smallest organisms in universe that can be seen with microscope.
Bacteria	Microorganisms having single cell and able to cause harm to human body.
Viruses	Tiny agents, which can cause harm and can only multiply in living cells.
Host	An organism that provides nutrient to another organism.
Mold	A type of fungi that grows on food usually in damp condition.
Antibiotics	Medicines used against bacterial infection.

GLOSSARY

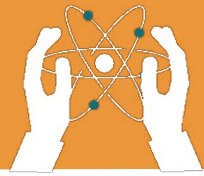

Diseases	The illnesses that affect your body and make you ill.
Microbiologist	The person who studies about microorganisms in detail.

UNIT NO 6: ELECTRIC CURRENT AND CIRCUITS

WORDS	MEANINGS
Electricity	Form of energy used to power devices.
Current	Flow of electric charges.
Components	Individual parts that make up whole system.
Circuit	A path through which electricity flows.
Appliances	Devices which are designed for household use and can run through electricity.

UNIT NO 7: REFLECTION, SHADOW AND TRANSPARENTS OBJECTS

WORDS	MEANINGS
Light	The natural or artificial brightness that makes things visible.
Shadow	A dark area formed when light is blocked.
Reflection	Bouncing back of light is called as reflection.
Translucent	Type of object that is not completely transparent.

GLOSSARY

Opaque

Something that does not allow light to pass through.

UNIT NO 8: SOUND PROPERTIES AND NOISE POLLUTION

WORDS	MEANINGS
Sound	Vibrations that travel through air, water etc. and can be heard.
Vibrations	Rapid back and forth downward and upward movement.
Volume	The loudness and softness of sound.
Pitch	The high and low quality of sound.
Frequency	How often something happens in a given time period.
Noise	Loud or unpleasant sounds that irritate others.

UNIT no 9: SOLAR AND LUNAR ECLIPSE

WORDS	MEANINGS
Eclipse	When an object comes in front of another object.
Partial	Not whole or only part of something.
Annular	Having a form of ring.
Solar Eclipse	When the Moon comes in between Earth and Sun casting the shadow.
Lunar Eclipse	When Earth comes in between Sun and Moon casting the shadow.
