COMPREHENSIONS

UNIT 13 COMPREHENSIONS

Passage 1 History of Pakistan

Pakistan was created on August 14, 1947, following the independence of the Indian subcontinent from British colonial rule. This historic event marked the culmination of years of struggle by the Muslims of India, led by the visionary leadership of Quaid-e-Azam Muhammad Ali Jinnah. Jinnah worked tirelessly to achieve a separate homeland for Muslims, uniting millions of people who desired freedom and the ability to practise their religion without fear or discrimination.

Under Jinnah's leadership, Muslims in India rallied around the idea of a separate nation where they could live according to their cultural, religious, and social practices. The creation of Pakistan was rooted in the Two-Nation Theory, which argued that Hindus and Muslims were two distinct nations, each with their own customs, religion, and traditions. This ideology highlighted the need for a separate state to safeguard the rights of Muslims in a Hindu-majority India.

The partition of British India led to the establishment of two independent nations: India and Pakistan. While the process of partition was marred by widespread violence and displacement, Pakistan's creation gave Muslims a place where they could live with dignity and freedom. The independence of Pakistan was a momentous event that not only changed the world map but also became a lasting symbol of unity and resilience for the Muslim community.

Questions

1. When was Pakistan created?
2. Which event led to the creation of Pakistan?
3. What is the Two-Nation Theory?
4. How did Quaid-e-Azam contribute to the creation of Pakistan?
5. What challenges do you think Muslims faced before the creation of Pakistan?
6. In your opinion, how important is having a homeland where people can freely practise their religion?
7. What does the word "resilience" mean in the context of the passage?
8. Identify the adjective in the sentence: "Pakistan's independence was a momentous event that changed the world map."

Passage 2 Environmental Awareness

The environment includes everything around us—air, water, soil, plants, animals, and even the climate. It provides the essential resources we need to survive, such as clean air, fresh water, fertile soil, and food. Protecting the environment is crucial for maintaining the balance of nature and ensuring the well-being of future generations.

Human activities, like cutting down forests, polluting rivers, burning fossil fuels, and wasting energy, cause harm to the environment. These actions lead to problems such as climate change, loss of wildlife, and shortage of clean water. If we continue to harm the environment, we risk losing the natural resources that sustain life on Earth.

However, small, everyday actions can make a big difference. Planting trees helps absorb carbon dioxide and produces oxygen.

Saving water ensures that future generations will have enough for their needs. Recycling reduces waste and conserves raw materials. By making environmentally conscious choices, everyone can contribute to protecting our planet.

Environmental awareness means understanding how our actions affect the Earth and taking steps to reduce our impact. Together, we can ensure a cleaner, healthier, and more sustainable world for ourselves and for future generations.

Questions

1. What is the environment, according to the passage?
2. Why is protecting the environment important?
3. What are some human activities that harm the environment?
4. Name three actions mentioned in the passage that can help protect the environment.
5. How do human actions like cutting down forests and polluting rivers affect the balance of nature?
6. How would life on Earth change if everyone became environmentally aware?
7. What does the word "sustainable" mean in the context of the passage?
8. Identify 4 adjectives and 2 adverbs in the passage above.

Passage 3 Famous Scientists

Throughout history, scientists have made incredible discoveries that have changed the way we understand the world. Here are four famous scientists and their contributions:

1. Albert Einstein (1879–1955)

Albert Einstein was a German physicist known for his groundbreaking theory of relativity. His equation $E=mc^2$ showed the relationship between energy and mass and revolutionized modern physics. Einstein's work earned him the Nobel Prize in 1921 for his explanation of the photoelectric effect. His ideas are still used today in technologies like GPS and in studies of space, such as black holes.

2. Marie Curie (1867–1934)

Marie Curie was a Polish–French scientist who became the first woman to win a Nobel Prize—and the only person to win in two different fields: Physics and Chemistry. She discovered the elements polonium and radium and conducted pioneering research on radioactivity. Her work laid the foundation for X-ray machines and cancer treatments.

3. Ibn Sina (Avicenna) (980–1037)

Ibn Sina, known as Avicenna in the West, was a Muslim scientist, philosopher, and physician. Born in Persia (modern-day Iran), he is called the "Father of Modern Medicine." His famous book, *The Canon of Medicine*, was used as a medical textbook in Europe and the Muslim world for centuries. He introduced concepts of

quarantine to prevent the spread of diseases and was a pioneer in pharmacology.

4. Alhazen (Ibn al-Haytham) (965–1040)

Alhazen was a Muslim scientist and mathematician from Basra (modern-day Iraq). He is regarded as the "Father of Optics" for his significant contributions to the study of light and vision. His book, *Kitab al-Manazir* (Book of Optics), explained how light enters the eye, influencing modern optics and the development of cameras. His scientific method of experimentation is a cornerstone of modern science.

Questions

1. Who was Albert Einstein, and what is he famous for?
2. For what work did Marie Curie win her Nobel Prizes?
3. What is the title of Ibn Sina's famous medical book?
4. Which famous equation was introduced by Einstein?
5. What scientific field did Alhazen contribute to significantly?
6. How did Ibn Sina's medical contributions influence the development of modern medicine?
7. Imagine you are a scientist like Marie Curie or Ibn Sina. What discovery or field would you focus on, and why?
8. What does the word "revolutionized" mean in the context of the passage?

Passage 4 Actions speak louder than words

Once upon a time, in the peaceful village of Greenvale, there lived a kind man named Ali. Ali was known for his generosity and warm words. He often spoke about helping others, sharing his dreams of making the village a better place for everyone. "One day, I will build a school for all the children," he would proudly tell his neighbours.

The villagers admired Ali's big dreams but often wondered why he never seemed to take action. He talked about planting trees to make the village greener, helping the elderly, and creating a safe space for children to play. Yet, year after year, nothing changed.

One day, a quiet stranger named Hamza moved to Greenvale. Hamza didn't talk much, and no one knew much about him. He simply smiled and greeted everyone politely. A few weeks after Hamza arrived, strange but wonderful things started happening in the village.

One morning, the villagers woke up to see a small playground built in the middle of the village. The children ran to play, their laughter filling the air. "Who did this?" everyone wondered. A week later, they found rows of trees planted along the dusty streets, providing shade and fresh air. The villagers were amazed.

Soon after, Hamza was seen fixing an old hut and turning it into a classroom. He brought books, chairs, and a blackboard. Children from all over the village began to gather there to learn. The villagers were overjoyed but curious. "Why haven't you told us about your plans?" they asked Hamza.

Hamza simply smiled and said, "**Actions speak louder than**

words.” Instead of talking about what needs to be done, I chose to do it.” His words stayed with the villagers, who realized the power of action.

Ali, inspired by Hamza’s work, finally decided to fulfil his promises. With Hamza’s help, he joined in making the village a greener, happier, and more educated place. From then on, the villagers learned to value deeds over empty promises.

Questions

1. Who were the two main characters in the story?
2. What did Ali often talk about doing for the village?
3. What changes did Hamza bring to the village?
4. What was the first thing Hamza built for the villagers?
5. What do you think made Ali change his behaviour?
6. Do you agree with Hamza’s statement, “Actions speak louder than words”? Why or why not?
7. What does the phrase “Actions speak louder than words” mean in the context of the story?
8. Identify two verbs in the sentence: “The villagers were overjoyed but curious.”

Passage 5 A Stitch in Time Saves Nine

Sara was a bright and cheerful Grade 6 student who loved school but often put off her work. One day, her teacher announced, “There will be an important exam in two weeks. Make sure you revise all the topics we’ve covered.” Sara nodded confidently, thinking, I have plenty of time; I’ll study later.

Days passed, and while her classmates diligently reviewed their notes, Sara spent her afternoons playing games, chatting with friends, and watching TV. Every evening, she told herself, “I’ll start studying tomorrow. It’s just one exam.”

A week before the exam, Sara's friend Hina asked, "Have you started preparing? I can help you if you want." Sara shrugged and replied, "Not yet. I'll start soon." Hina frowned but left her to her own choices.

Finally, the day before the exam arrived, and Sara panicked. She hadn't even opened her books! She tried to cram all the topics in one night but became overwhelmed and confused. Important points slipped from her mind, and she couldn't concentrate. Exhausted and anxious, she barely slept.

The next day, Sara sat in the exam hall, staring at the paper. Many of the questions looked unfamiliar because she hadn't prepared in advance. Her confidence crumbled, and she struggled to answer. When the results came out, Sara's heart sank—she hadn't done well.

Hina comforted her and said, "Sara, this happened because you didn't prepare on time. Remember, a stitch in time saves nine. If you had studied a little every day, you wouldn't have faced this problem."

Sara realized her mistake and promised herself that she would never leave her work until the last minute again. From then on, she became more disciplined and always stayed prepared.

Questions

1. What announcement did Sara's teacher make?
2. How did Sara spend her time instead of studying?
3. What happened when Sara tried to study the night before the exam?
4. What lesson did Sara learn from her experience?
5. Why do you think Sara kept delaying her studies even though she knew about the exam?
6. Have you ever delayed something important, like Sara? How did it affect you?

7. What does the word "cramming" mean in the context of the story?

8. Find and underline the adverbs in the sentence:

"Sara confidently nodded at the teacher but later procrastinated and tried to study hurriedly the night before the exam."

Passage 6 The Role of AI

Artificial Intelligence (AI) is one of the most remarkable advancements in technology. AI refers to the ability of machines to perform tasks that typically require human intelligence, such as learning, problem-solving, and decision-making. It plays a vital role in our daily lives, from virtual assistants like Siri and Alexa to personalized recommendations on platforms like YouTube and Netflix. AI has made it easier for people to shop, learn, and stay entertained.

In education, AI helps students with personalized learning experiences by identifying their strengths and weaknesses. In health care, it assists doctors in diagnosing diseases and predicting treatment outcomes. AI is also used in transportation, powering self-driving cars and optimizing traffic flow.

However, AI has its challenges. One major concern is job displacement, as machines can now perform tasks that were once done by humans. Another issue is data privacy, as AI systems often collect and analyze vast amounts of personal information. Additionally, relying too much on AI can reduce human creativity and critical thinking.

While AI has many benefits, it is essential to address its drawbacks. Using technology responsibly and ethically is key to ensuring that AI serves humanity in the best possible way.

Questions

1. Name three areas where AI is commonly used in daily life.
2. How does AI assist students in education?
3. What role does AI play in health care?
4. What are some challenges associated with AI?
5. Why do you think AI is considered one of the most remarkable advancements in technology?
6. How might AI reduce human creativity and critical thinking?
7. Do you think AI is more beneficial or harmful to society? Why?
8. Identify an adverb in the sentence: "AI systems often collect and analyze vast amounts of personal information."

Passage 7 Abdul Sattar Edhi: The Angel of Mercy

Abdul Sattar Edhi is regarded as one of the greatest humanitarians in history. Born in 1928 in a small town in Gujarat, British India, Edhi moved to Pakistan after partition. Witnessing the immense suffering around him, he made it his life's mission to serve humanity. Despite having limited personal resources, Edhi started with a single room and a vision to help the destitute.

Over the years, his efforts grew into the Edhi Foundation, the largest and most trusted charitable organization in Pakistan.

The Edhi Foundation provides a wide range of services, including free hospitals, orphanages, homeless shelters, and a fleet of ambulances. The foundation is known for its motto: "No religion is higher than humanity." Edhi believed in helping anyone in need, regardless of their background, race, or religion. His tireless work earned him immense respect in Pakistan and internationally.

Edhi's most notable achievement is establishing Pakistan's largest ambulance network, which operates across the country,

providing emergency medical care to millions. His orphanages offer shelter to abandoned children, while his homes for the elderly and mentally ill provide care for society's most vulnerable population. Edhi's simple lifestyle reflected his values—he wore plain clothes, owned minimal possessions, and lived in a modest apartment above his organization's office.

Even after his death in 2016, Edhi's legacy continues. The Edhi Foundation remains a beacon of hope, supported by volunteers and donors inspired by his work. Abdul Sattar Edhi's life teaches us that true greatness lies in selfless service to humanity.

Questions

1. What life event inspired Edhi to dedicate himself to serving humanity?
2. What is the name of the charitable organization founded by Abdul Sattar Edhi?
3. List the services provided by the Edhi Foundation.
4. When did Abdul Sattar Edhi pass away?
5. Why is Abdul Sattar Edhi considered one of the greatest humanitarians in history?
6. How can individuals in society contribute to continuing Edhi's legacy?
7. What lessons can young people learn from Edhi's life and work?
8. Identify the adjectives in the sentence: "Edhi's tireless work earned him immense respect both in Pakistan and internationally."
