

4. TECHNOLOGICAL REVOLUTION

SUMMARY

Technology has changed human life completely. It has not only improved economy but has exalted the standard of human life to the optimum point. Every day, there is new innovation almost every walk of human life. Technological revolution is the driving force of changing life of the people on the earth. The invention of telephone, radio, television, mobile, computer and internet owe to technology that have facilitated our lives to the fullest. In any emergency, we have now the host of facilities. We can call the police, our relating for help. Ambulances can be called in a jiffy and one can be jolted to hospital very fast. With the grace of Almighty Allah, our new generation is fully equipped with technology. They can get any piece of information while sitting at home with the help of the internet. During Corona Virus pandemic technology helped the mankind. Online classes on Google Classroom, Microsoft Teams and Zoom, the gifts of technology sustained the education on primary, secondary and tertiary level. Tele school, tele doctor and a score of other facilities are blessings of technology. Weather forecasting technology keeps us aware of hurricanes, cyclones, tsunamis, whirlwind and tornado. New vehicles have new technology, which have safety features like anti-brake system and airbags. No doubt, in contemporary life there is big technological revolution in automobile industry. We have more efficient vehicles which are not only fast but very impressive in fuel economy as well.

EXERCISE 1- POST READING

Q1. What do you mean by technological revolution?

Ans: A technological revolution is the big changes which occur in human life due to progress in the field of science and technology. The invention of telephone, radio, television, mobile phone, computer and internet are vivid examples of technological revolution. We just move our hands, under the taps, water starts coming out due to the sensors. In short, it is the technological revolution which has enabled billions of the people spend happier and safer life.

Q2. Why did innovation remain scarce at the time of World War II?

Ans: Many innovations arose at that time but the information remained scarce and hard to use and transmit. There was a reason for it. The storage of information was on the atom rather than on bits. It was in analog form. It was not digital. Now a days we have tele pointers, copier, and printer to record. The information speeches, lectures and other useful information is recorded.

Q3. How is technology born for students?

Ans: Technology has benefited almost everyone in every work of life. The students are probably benefited the most. Information regarding any topic is just under the finger tips. Students google any information on internet. They use Google Scholar, Sci Hub and Libgen for the research purposes. Sitting at home students can study in online classes through Zoom, Microsoft Teams, and Google Classroom or from any tele schools.

Q4. What are the benefits of E-commerce?

Ans: E-commerce has changed the world of commerce completely. While sitting at home, we can buy anything anywhere in the world. E-bay, Amazon and many other sites are very famous internationally. In our country, Daraz, Ali Baba are very famous. We can order anything anytime. Our order is delivered in twenty-four hours. Food Panda is very easy way of ordering food which is delivered very fast.

Q5. How has technology greatly supported doctors and medical practitioners?

Ans: Technology has done wonders. It has changed the whole life completely. Doctors and medical practitioners are facilitated by technology. Laboratories help them in diagnostics. Using different apparatus, they diagnose the disease. Sitting at home through video calls, and software, the patients are checked and medicine is prescribed.

rather cured completely. They can attend medical conferences anywhere in the world increasing their professional skills.

Q6. How does technology secure humans from calamities? OR How did technology contribute in keeping peoples' lives during the recent pandemic?

Ans: Technology warns us about storms like hurricanes, tornados, whirl wind, cyclones and tsunamis. We take precautionary measures and keep us safe. In the recent pandemic technology has assisted us to great extent. Students started their education virtually. Online classes, through zoom, google classroom, Microsoft team and skype helped the educationists and students a lot. New information about SOPs of Coronavirus spread life grass fire due to technological advances. It was the technology which helped human being in inventing the vaccine of the corona virus. In short, technology helps us in any calamity whether there is flood, earth quake or any pandemic.

Q7. Youngsters are not safer in technology era. Do you agree or disagree?

Ans: I agree to this statement. Youngsters are unsafe in this age of technology. They are unaware with the use of certain appliances and apparatus which proves fatal for them. The careless use of electricity can cause death. It is the vivid example that youngsters are unsafe in an era of technology. If they use the gifts of technology carefully then these may be safe for them.
