● **Definition**

Fractions represent the parts of a whole or collection of objects. A fraction has two parts. The number on the top of the line is called the numerator. The number below the line is called denominator.

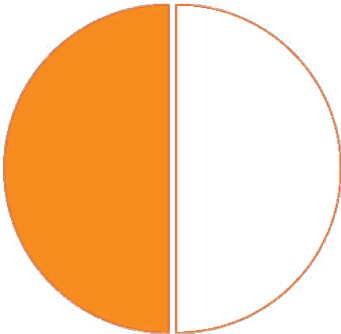

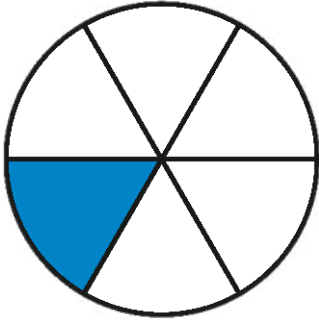

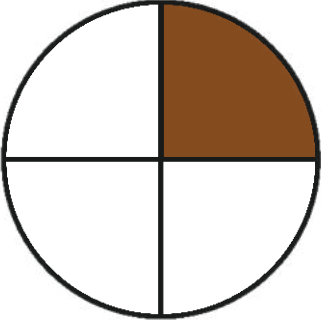

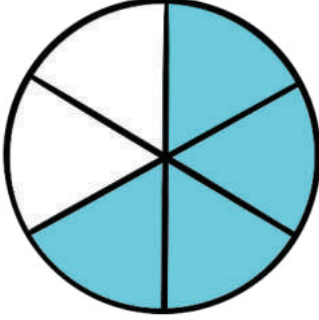

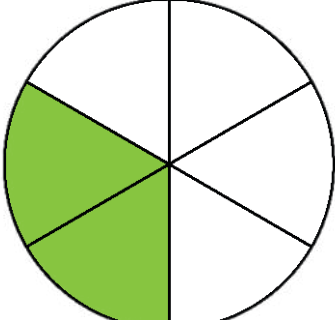

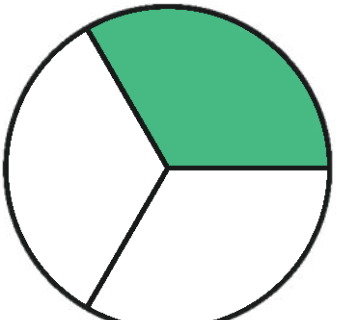

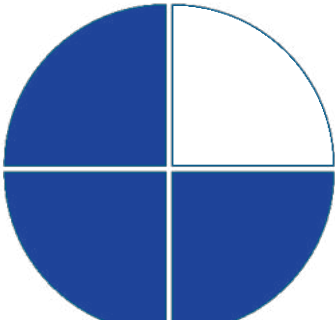

Such as,

$$\frac{2}{5}, \frac{5}{9}, \frac{3}{6}$$

Write the numerator and denominator in the table.

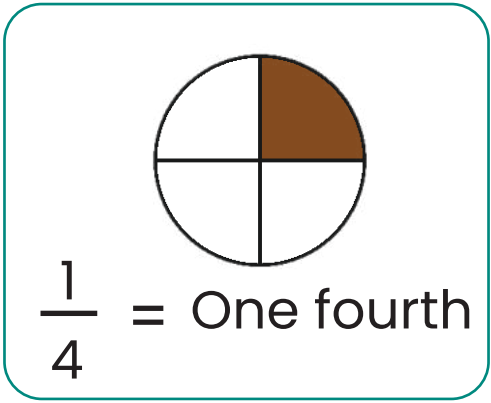

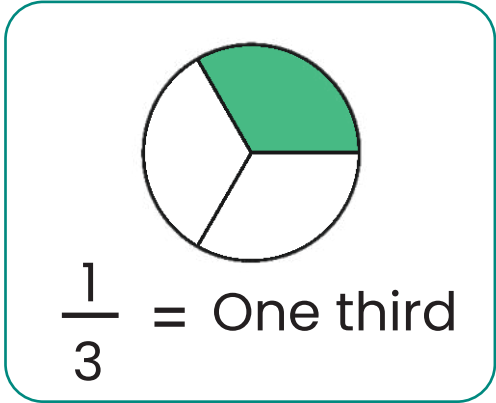

Fraction		Numerator	Denominator
$\frac{1}{2}$			
$\frac{2}{3}$			
$\frac{3}{4}$			
$\frac{2}{5}$			
$\frac{5}{6}$			
$\frac{3}{5}$			
$\frac{9}{10}$			

- Look at the circles. Each circle has some parts shaded. Write the fraction that shows how many parts are shaded.

 $= \frac{1}{2}$	 $= \text{---}$
 $= \text{---}$	 $= \text{---}$
 $= \text{---}$	 $= \text{---}$
 $= \text{---}$	 $= \text{---}$

- Write the fraction in words.

Examples:

$\frac{1}{2}$		$\frac{2}{3}$	
$\frac{1}{4}$		$\frac{1}{6}$	
$\frac{2}{4}$		$\frac{3}{5}$	
$\frac{3}{4}$		$\frac{2}{5}$
