

UNIT 2

ALL ABOUT ANIMALS

Learning objectives:

- Identify different kinds of animals and their characteristics.
- Differentiate between mammals, birds, reptiles, insects, amphibians, and fish based on their body features.
- Explain the purpose of different body coverings (fur, feathers, scales, moist skin).
- Recognize how animals adapt to their environment for survival.
- Classify animals into their correct groups based on their features.

What Are Some Kinds of Animals?

There are many kinds of animals.

Animals have different body coverings to help them live.

▲ Fur keeps otters warm and dry in cold water.

1. Mammals

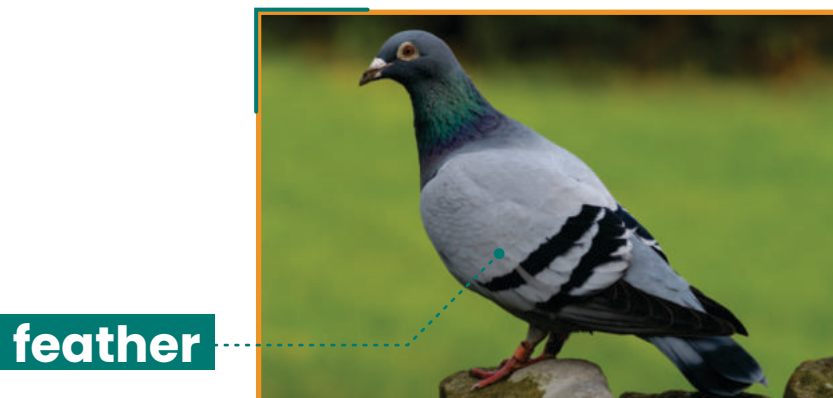

- **Features:** They are animals with hair or fur, and they feed their babies milk.
- **Examples:** Horses, dogs, cats, and elephants.

▲ A horse is a mammal.

2. Birds

- **Features:** They are animals that have feathers and lay eggs.
- **Examples:** Parrots, pigeons, sparrows, and eagles.

▲ A pigeon is a bird.

3. Reptiles

- **Features:** They are animals with dry skin covered in scales.
- **Examples:** Snakes, lizards, and turtles.

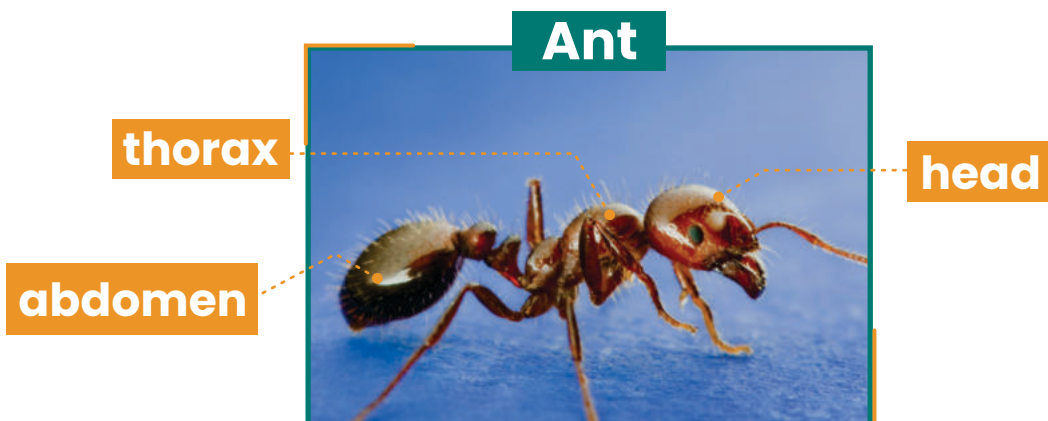

snake

▲ A snake is a reptile.

4. Insects

- **Features:** They are animals with three body parts head, thorax, abdomen and six legs.
- **Examples:** Ants, butterflies, and ladybugs.

▲ An ant is an insect.

5. Amphibians

- **Features:** They are animals that can live both on land and in water. They have smooth, moist skin and lay eggs in water.
- **Examples:** Frogs, toads, and salamanders.

Frog

Toad

Salamander

6. Fish

- **Features:** They are animals that live in water, breathe with gills, and have fins.
- **Examples:** Goldfish, sharks, and salmon.

▲ A shark is a fish

What Do Animals Need to Live ?

Animals need food, water, and air.
They need a safe place to live.

▲ This bear eats plants.

▲ These raccoons live in a log.

Test Your Understanding

Q1: What makes mammals different from other animals?

Ans: _____

Q2: How do fish breathe underwater?

Ans: _____

Q3: Why do birds have feathers?

Ans: _____

Q4: What are the animals called that need to live both on land and in water?

Ans: _____

Q5: How do reptiles protect themselves from drying out?

Ans: _____

Q6: What is the main difference between insects and mammals?

Ans: _____

Fill in the blanks.

1. Mammals feed their babies _____.
2. Birds lay _____ and have _____ on their
bodies.
3. _____ are animals that have three body parts and
six legs.
4. Fish breathe through their _____.
5. Reptiles have dry skin covered with _____.
6. Frogs are _____ because they live both on land
and in water.

Tick (✓) for True and cross (x) for False statements.

1. All birds can fly. ()

2. Mammals lay eggs. ()

3. Insects have six legs. ()

4. Fish use their lungs to breathe underwater. ()

5. Amphibians can only live in water. ()

6. Snakes are reptiles. ()

Choose the correct answer:

1. Why do mammals have fur or hair?

- a) To make them look beautiful
- b) To keep them warm
- c) To help them breathe

2. Why do birds have feathers instead of fur?

- a) Feathers help them fly
- b) Feathers make them look colourful
- c) Feathers help them hear better

3. What would happen if a fish did not have gills?

- a) It could not swim
- b) It could not breathe underwater
- c) It would grow wings

4. Why do reptiles have dry, scaly skin?

- a) To make them heavy
- b) To protect their body and keep them from losing water
- c) To help them swim faster

5. If a frog loses its moist skin, what will happen?

- a) It will become a reptile
- b) It will not be able to live on land or water
- c) It will lay eggs in trees

6. Why do insects have six legs and three body parts?

- a) To help them move and survive in different environments
- b) To make them bigger than other animals
- c) To help them breathe underwater

Guess the Animal – Mystery Box

ACTIVITY

Instructions:

1.Prepare Boxes: Label six boxes with Mammals, Birds, Reptiles, Insects, Amphibians, and Fish. Place toy animals or picture cards inside.

2.Guessing Round: A student picks an animal (without looking) and describes its features without naming it.

3.Class Participation: Others guess the animal. After a few attempts, the student reveals and places it in the correct category.

4.Discussion: The student explains why the animal belongs in that category (e.g., "A frog is an amphibian because it lives on land and in water").
