

UNIT 5

FOUNDATIONS OF GRAPHIC DESIGNING

Learning Objectives

1. Understand the concept and significance of graphic designing in everyday life.
2. Identify the fundamental principles of graphic design and apply them to simple projects.
3. Learn the basics of colour theory, including the colour wheel, schemes, and the psychology of colours.
4. Use MS Paint for basic design exercises to apply graphic design principles.

1. What is Graphic Designing?

Graphic designing is the art of combining visuals, text, and ideas to communicate a meaningful message effectively. It impacts many fields, from advertising to education, and is part of our daily interactions.

Applications of Graphic Designing

- **Advertising:** Posters, banners, and social media posts.
- **Branding:** Logos, packaging, and brand identity.
- **Education:** Illustrations, infographics, and learning materials.
- **Entertainment:** Movie posters, animations, and video games.

MS Paint Hands-on Activity

- **Objective:** Explore how to create basic shapes and text in MS Paint.
- **Steps:**
 1. Open MS Paint and explore the interface (toolbars, shapes, text tool).
 2. Use the **Rectangle**, **Oval**, and **Line** tools to create a simple layout.
 3. Add text to label the design (e.g., "Welcome to Graphic Designing").
 4. Save the file with a proper name (e.g., "My First Design").

2. Principles of Graphic Design

Graphic design principles ensure that designs are organized, appealing, and effective in communicating messages.

Key Principles of Graphic Design

1. **Balance:** Symmetrical vs. asymmetrical designs.
2. **Contrast:** Highlighting differences using size, colour, or shape.
3. **Alignment:** Ensuring text and images are well-organized.
4. **Repetition:** Creating a consistent look and feel.
5. **Proximity:** Grouping related elements together.
6. **Hierarchy:** Emphasizing important elements first.

MS Paint Hands-on Activity

• **Objective:** Design a balanced and visually appealing flyer for a school event.

• **Steps:**

1. Open MS Paint and create a **Symmetrical Design** for a Sports Day flyer.
2. Use the **Text Tool** to add event details (e.g., date, time, and venue).
3. Apply **Alignment** by keeping text centered or justified.

3. Introduction to Colour Theory

What is Colour Theory?

Colour theory is the study of how colours interact and how they can be combined to create visually appealing designs.

The Colour Wheel

- **Primary Colours:** Red, Blue, Yellow.
- **Secondary Colours:** Green, Orange, Purple.
- **Tertiary Colours:** Created by mixing primary and secondary colours.

Colour Schemes

1. **Monochromatic:** Variations of one colour.
2. **Analogous:** Colours next to each other on the wheel.
3. **Complementary:** Opposite colours on the wheel.
4. **Triadic:** Three evenly spaced colours on the wheel.

MS Paint Hands-on Activity

- **Objective:** Create a colourful background design using the colour wheel concepts.
- **Steps:**
 1. Open MS Paint and use the **Fill Tool** to apply colours to shapes.
 2. Create a **Monochromatic Design** with varying shades of a single colour.
- Save the file as "Colour Wheel Practice."

Analogous colors

4. Psychology of Colours

How Colours Influence Emotions

- **Red:** Passion, urgency, energy (e.g., sale banners).
- **Blue:** Trust, calmness, professionalism (e.g., corporate branding).
- **Yellow:** Happiness, optimism (e.g., children's toys).
- **Green:** Nature, health, and wealth (e.g., eco-friendly brands).
- **Black:** Elegance, sophistication (e.g., luxury items).
- **White:** Simplicity, purity, and peace (e.g., minimalist designs).

MS Paint Hands-on Activity

- **Objective:** Design a thematic poster based on colour psychology.
- **Steps:**
 1. Select a theme (e.g., "Save the Planet" or "Back to School").
 2. Use colours that match the mood of the theme (e.g., green and blue for nature).
 3. Add shapes, text, and appropriate colours to complete the poster.

EXERCISES

01: Choose the correct answer.

1. Which of the following is a primary colour?

- a) Green
 - b) Red
 - c) Purple
 - d) Orange
-

2. What is the purpose of contrast in graphic design?

- a) To make designs balanced
 - b) To highlight differences and draw attention
 - c) To group elements together
 - d) To align text and images
-

3. The Colour Wheel is used to:

- a) Create shapes in designs
 - b) Understand the relationship between colours
 - c) Arrange text in a design
 - d) Measure alignment
-

4. What is the main purpose of graphic designing?

- a) To decorate websites
 - b) To create animations
 - c) To combine visuals, text, and ideas to communicate a message
 - d) To write code for design software
-

5. Which of the following is a principle of graphic design?

- a) Blurring
- b) Balance
- c) Mixing
- d) Layering

6. What is the term for colours that are next to each other on the colour wheel?

- a) Monochromatic
- b) Complementary
- c) Analogous
- d) Triadic

7. Which of these colours is most associated with trust and professionalism?

- a) Red
- b) Blue
- c) Yellow
- d) Green

8. Repetition in graphic design is used to:

- a) Create balance
- b) Add emphasis to certain elements
- c) Maintain consistency and style
- d) Adjust alignment

9. What is the main purpose of using hierarchy in design?

- a) To balance the design
- b) To group elements together
- c) To guide the viewer's focus
- d) To align elements properly

10. What is the default background colour in MS Paint?

- a) White
 - b) Black
 - c) Blue
 - d) Red
-

02: Fill in the blanks:

1. Graphic designing is the art of combining _____, _____, and ideas to communicate a meaningful message.
2. The primary colours are red, blue, and _____.
3. _____ is the principle that groups related elements together to enhance readability.
4. _____ colours are created by mixing primary and secondary colours.
5. Green and red are _____ colours on the colour wheel.
6. The colour _____ is often associated with passion, urgency, and energy.

03: Select True or False for each statement.

	TRUE	FALSE
Symmetrical designs are visually unbalanced.	☐	☐
The colour green is associated with nature and health.	☐	☐
Contrast is used to group related elements in a design.	☐	☐
MS Paint is a software used for graphic designing and editing.	☐	☐
Complementary colours are next to each other on the colour wheel.	☐	☐
Repetition helps in maintaining consistency in design.	☐	☐

04: Answer the following questions briefly.

1. What is the purpose of a colour wheel in graphic designing?
2. What is graphic designing, and what is its main purpose?
3. What does the principle of contrast in graphic design refer to?
4. Name two tools in MS Paint and their functions.
5. What is the difference between analogous and complementary colours?

05: Provide detailed answers for the following questions.

1. Explain the principles of graphic design with examples.
2. How does colour psychology influence the effectiveness of branding? Provide examples.
3. Write a detailed note on monochromatic, analogous, and complementary colour schemes with examples of where they can be applied.
4. Design a thematic poster in MS Paint for an “Eco-Friendly Campaign.” Explain the process and how you chose the colours and layout.

Lab Activity 1: Designing a Flyer in MS Paint

- **Objective:** Create a Sports Day flyer using balance and contrast.
- **Tools:** Text Tool, Shape Tool, Fill Tool.
- **Steps:**
 1. Open MS Paint.
 2. Create a symmetrical layout with shapes.
 3. Add event details using the Text Tool.
 4. Use contrasting colours for headings and body text.

Lab Activity 2: Exploring Colour Schemes

- **Objective:** Use MS Paint to design three backgrounds based on monochromatic, analogous, and complementary colour schemes.
- **Tools:** Fill Tool, Brush Tool.
- **Steps:**
 1. Create three separate designs in MS Paint.
 2. Use the Fill Tool to apply colour schemes (one scheme per design).
 3. Label each design according to its colour scheme.

Lab Activity 3: Poster Design with Colour Psychology

•**Objective:** Design a thematic poster (e.g., “Save the Planet”) using appropriate colours based on their psychological impact.

•**Tools:** Text Tool, Shape Tool, Fill Tool.

•**Steps:**

1. Choose a theme and brainstorm suitable colours (e.g., green and blue for nature).
2. Create the layout in MS Paint using the Shape Tool.
3. Add text to convey the message of the poster.
