

UNIT 7

CREATIVE PROJECTS WITH PHOTOSHOP SELECTION TOOLS

Learning Objectives

1. Identify and use the Elliptical Marquee Tool to create circular or oval selections, applying feather effects to design vignette effects on portraits.
2. Utilize Single Column and Single Row Marquee Tools to create vertical and horizontal grid lines for decorative patterns and accents.
3. Select and isolate straight-edged objects like buildings using the Polygonal Lasso Tool to create and manipulate angular designs.
4. Use the Magnetic Lasso Tool to select objects with distinct edges and seamlessly replace backgrounds.
5. Apply selection tools to create and modify designs, including collages, vignettes, patterns, logos, greeting cards, and custom backgrounds.

Introduction to Elliptical Marquee

- **Purpose:**

- The Elliptical Marquee tool allows you to create circular or oval-shaped selections. It is useful for isolating round or curved elements in an image.

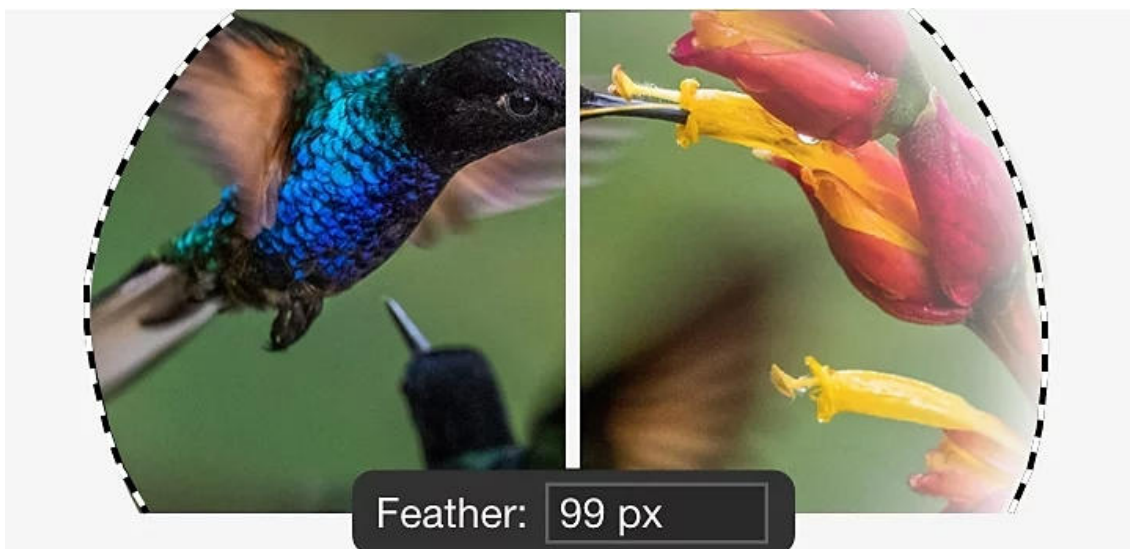

- **How to Use:**

1. Select the Elliptical Marquee Tool from the toolbar.
2. Click and drag on the canvas to create an oval selection.
3. Hold Shift while dragging to create a perfect circle.
4. Adjust the selection by dragging the edges or repositioning it.

- **Practical Use Case:** Use this tool to create a vignette effect around a portrait or to highlight a circular object in a design.

Lab Activity:

1. Open an image and use the Elliptical Marquee Tool to create a circular selection around a face.
2. Feather the selection (Select > Modify > Feather) and apply a colour overlay or blur effect.

Single Column Marquee

• Purpose:

◦ This tool selects a single vertical line of pixels, often used for creating precise grid-like effects or editing specific areas.

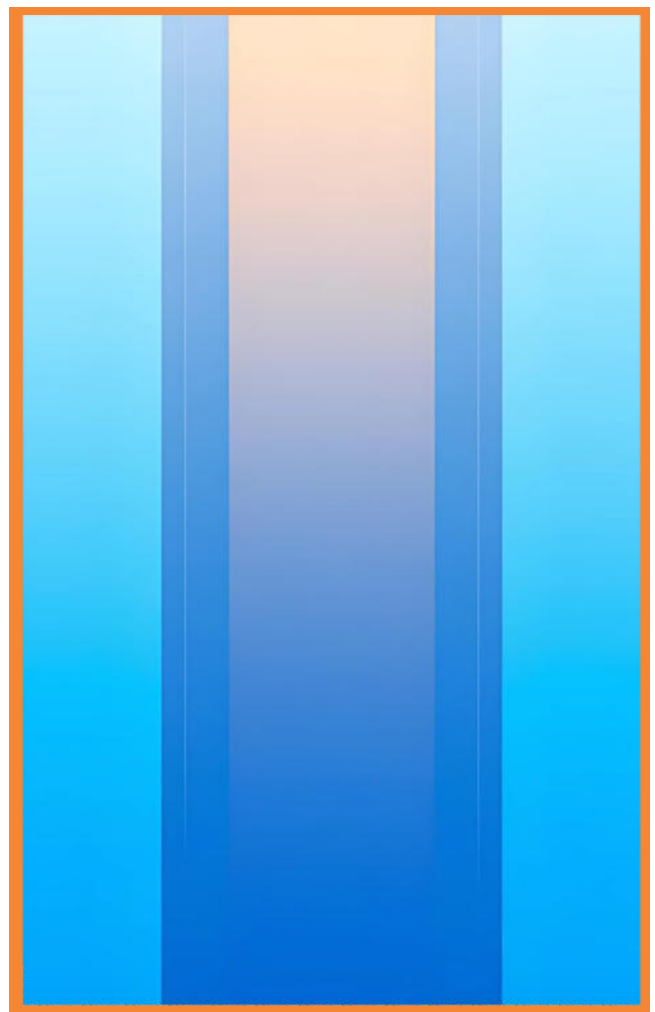

• How to Use:

1. Select the Single Column Marquee Tool from the toolbar.
2. Click anywhere on the canvas to create a vertical selection.
3. Copy, move, or apply effects to the selected column.

• **Practical Use Case:** Add visual emphasis to designs by creating vertical lines or patterns.

Lab Activity:

1. Create a gradient background. Use the Single Column Marquee Tool to select vertical lines and apply a colour fill or stroke.

Single Row Marquee

• Purpose:

- Similar to the Single Column Marquee, this tool selects a single horizontal line of pixels, useful for creating stripes or precise edits.

• How to Use:

1. Select the Single Row Marquee Tool from the toolbar.
2. Click anywhere on the canvas to create a horizontal selection.
3. Apply effects like colour fills, patterns, or strokes.

- **Practical Use Case:** Use it to create grid-like effects or add a thin line accent in designs.

Lab Activity:

1. Open a blank canvas and use the Single Row Marquee Tool to create horizontal stripes.
2. Apply alternating colours to the stripes for a decorative effect.

Polygonal Lasso

• Purpose:

- The Polygonal Lasso Tool is ideal for making straight-edged selections, such as isolating buildings, signs, or other angular objects.

• How to Use:

1. Select the Polygonal Lasso Tool from the toolbar.
2. Click to create points along the edges of the object you want to select.
3. Double-click to close the selection or connect back to the starting point.

• **Practical Use Case:** Extract architectural elements or geometric shapes from an image for design projects.

Lab Activity:

1. Open an image with a clear object like a building or sign.
2. Use the Polygonal Lasso Tool to select the object.
3. Copy the selection to a new layer and add a drop shadow.

Magnetic Lasso

• Purpose:

- The Magnetic Lasso Tool automatically snaps to the edges of objects, making it efficient for selecting complex shapes.

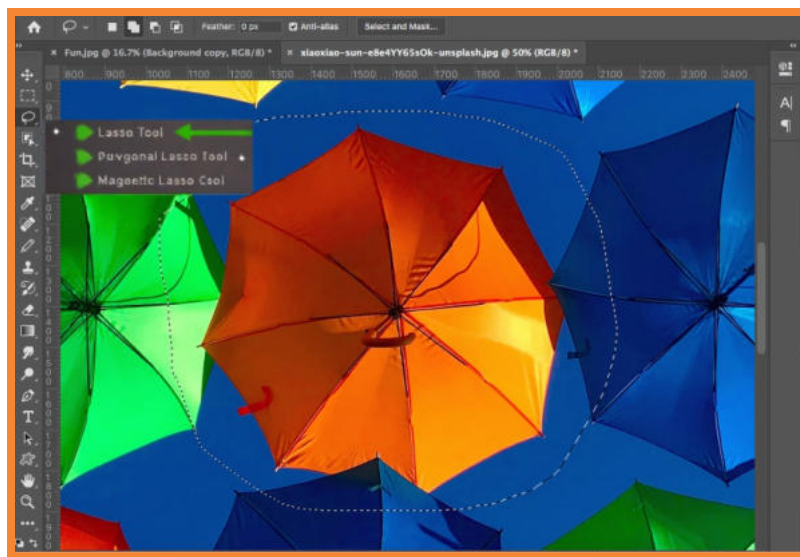

• How to Use:

1. Select the Magnetic Lasso Tool from the toolbar.
2. Drag the tool along the edge of an object; the selection will snap to its contour.
3. Adjust the edge by adding anchor points or deleting unnecessary ones.

- **Practical Use Case:** Perfect for selecting objects with distinct edges, like a person or a product in an image.

Lab Activity:

1. Open an image with a product or person.
2. Use the Magnetic Lasso Tool to select the object and remove the background.
3. Add a new background layer to replace the original.

EXERCISES

01: Choose the correct answer.

1. Which tool is used to create circular or oval-shaped selections?

- a) Rectangular Marquee Tool
 - b) Polygonal Lasso Tool
 - c) Elliptical Marquee Tool
 - d) Magnetic Lasso
-

2. Holding the Shift key while using the Elliptical Marquee Tool creates a:

- a) Rectangle
 - b) Triangle
 - c) Perfect circle
 - d) Horizontal line
-

3. Which tool selects a single horizontal line of pixels?

- a) Single Column Marquee
 - b) Single Row Marquee
 - c) Rectangular Marquee
 - d) Magnetic Lasso Tool
-

4. The Magnetic Lasso Tool is best for selecting:

- a) Blurry backgrounds
- b) Circular shapes
- c) Straight-edged buildings
- d) Polygonal Lasso Tool

5. What tool is useful for selecting angular objects like buildings?

- a) Magnetic Lasso Tool
- b) Polygonal Lasso Tool
- c) Single Row Marquee
- d) Elliptical Marquee Tool

6. Which selection tool automatically snaps to edges?

- a) Rectangular Marquee Tool
- b) Polygonal Lasso Tool
- c) Magnetic Lasso Tool
- d) Single Column Marquee Tool

7. What is the primary use of the Single Column Marquee Tool?

- a) Select rows of pixels
- b) Draw shapes
- c) Create vertical lines
- d) Fill backgrounds

8. Which tool can be used to isolate a person and replace the background?

- a) Magnetic Lasso Tool
 - b) Elliptical Marquee Tool
 - c) Single Row Marquee Tool
 - d) Polygonal Lasso Tool
-

9. What happens when you feather a selection?

- a) It adds a border
- b) It smooths the edges
- c) It erases the selection
- d) It crops the image

10. What is the final step when using the Magnetic Lasso Tool for background replacement?

- a) Resize the image
- b) Invert the selection
- c) Save the image
- d) Paste the selection on a new background

02: Select True or False for each statement.

	TRUE	FALSE
The Elliptical Marquee Tool is used for selecting rectangular shapes.	☐	☐
The Single Row Marquee Tool selects a single vertical line.	☐	☐
The Polygonal Lasso Tool is suitable for selecting buildings and signs.	☐	☐
The Magnetic Lasso Tool requires manual clicking at every point.	☐	☐
The Single Column and Single Row Marquee Tools can be used to create grid patterns.	☐	☐

03: Answer the following questions briefly.

1. What is the purpose of the Polygonal Lasso Tool?
2. How do you create a vignette effect using the Elliptical Marquee Tool?
3. What does feathering do in Photoshop?
4. When would you use the Single Row Marquee Tool?
5. What is the benefit of using the Magnetic Lasso Tool?

04: Provide detailed answers for the following questions.

1. Explain how to create a custom pattern using Single Row and Single Column Marquee Tools.
2. Describe the steps to replace a background using the Magnetic Lasso Tool.

Creative Projects with Photoshop

Lab Activity :1 Selection Tools

• **Objective:** Explore the Marquee and Lasso tools to create and modify selections.

• **Instructions:**

1. Open an image of your choice.
2. Use the Rectangular Marquee Tool to select and copy a part of the image to a new layer.
3. Create a circular cutout using the Elliptical Marquee Tool and apply a feather effect.
4. Use the Polygonal Lasso Tool to isolate an angular object and place it on a separate background.
5. Use the Magnetic Lasso Tool to select a person or product and replace the background with a solid colour.

Lab Activity :2 Create a Collage with Cutouts

- **Objective:** Practise using the Marquee and Lasso tools to make precise selections and combine images.
- **Steps:**
 1. Open multiple images of people, objects, or landscapes.
 2. Use the Polygonal Lasso Tool to cut out objects or subjects from the images.
 3. Arrange the cutouts creatively on a blank canvas to form a collage.
 4. Add text or decorative shapes for enhancement.
- **Skills Covered:** Polygonal Lasso, Magnetic Lasso, Layer management, and basic composition.
- **Outcome:** A vibrant photo collage with neatly isolated elements.

Lab Activity :3 Vignette Effect on a Portrait

- **Objective:** Use the Elliptical Marquee Tool to create a vignette effect for a portrait image.

- **Steps:**

1. Open a portrait photo.
2. Use the Elliptical Marquee Tool to select the subject's face.
3. Feather the selection (Select > Modify > Feather) and invert it (Select > Inverse).
4. Apply a black fill or blur effect to the edges.

- **Skills Covered:** Elliptical Marquee, feathering, and adjustment layers.

- **Outcome:** A polished vignette effect focusing on the portrait.

Lab Activity :4 Create a Custom Pattern

- **Objective:** Use Single Column and Single Row Marquee tools to design a unique pattern.

- **Steps:**

1. Create a new canvas and set the background colour.
2. Use the Single Column and Single Row Marquee tools to create intersecting grid lines.
3. Add colours, gradients, or shapes within the grid for visual appeal.
4. Save the final design as a pattern (Edit > Define Pattern).

- **Skills Covered:** Precision selection, grid creation, and pattern design.

- **Outcome:** A custom pattern ready for reuse in other designs.

Lab Activity :5 Design a Creative Logo

- **Objective:** Use Lasso tools and geometric shapes to design a modern logo.
 - **Steps:**
 1. Create a blank canvas with a transparent background.
 2. Use the Polygonal Lasso Tool to create angular shapes, and fill them with vibrant colours.
 3. Use the Magnetic Lasso Tool to isolate objects from images and incorporate them into the design.
 4. Add text and apply layer styles for a professional look.
 - **Skills Covered:** Lasso tools, colour fills, and text Integration.
- Outcome:** A sleek and creative logo.

Lab Activity :6 Create a Themed Greeting Card

- **Objective:** Combine selection tools with design elements to make a greeting card.
- **Steps:**
 1. Open a new file and set dimensions suitable for a card (e.g., 1200x1800 pixels).
 2. Use the Elliptical Marquee Tool to create decorative circular elements.
 3. Use the Polygonal Lasso Tool to add angular decorations.
 4. Add a meaningful text layer with layer styles like shadows or gradients.
- **Skills Covered:** Marquee and Lasso tools, text design, and composition.
- **Outcome:** A fully designed greeting card for an event or occasion.

Lab Activity :7 Replace a Background

- **Objective:** Use the Magnetic Lasso Tool to isolate a subject and replace its background.
- **Steps:**
 1. Open an image with a distinct subject (e.g., a person or object).
 2. Use the Magnetic Lasso Tool to carefully outline and select the subject.
 3. Copy the selection and paste it onto a new background image.
 4. Adjust the colours and lighting to blend the subject seamlessly with the new background.
- **Skills Covered:** Magnetic Lasso, background replacement, and blending.
- **Outcome:** A professionally edited image with a replaced background.
