

UNIT 6

ADVANCED ADOBE PHOTOSHOP TECHNIQUES

Learning Objectives

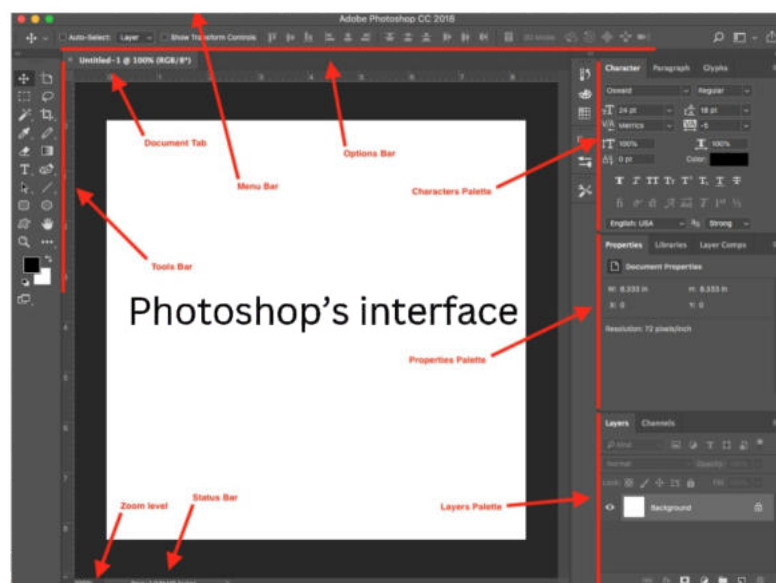

- Identify key components of Adobe Photoshop's interface, including the Toolbar, Layers Panel, and Options Bar.
- Create and manage files using custom dimensions and document presets.
- Perform basic layer operations: add, delete, duplicate, lock, and rearrange layers.
- Use basic tools like Move, Brush, Text, and Shape tools for design creation.
- Make selections using Marquee, Lasso, and Quick Selection tools.
- Apply colour fills, gradients, and match colors using the Eyedropper tool.
- Enhance images with basic filters and effects like Blur, Sharpen, and Artistic filters.
- Save projects in PSD format and export in JPEG or PNG formats.
- Utilize keyboard shortcuts for efficient workflow.
- Complete creative projects, including logo design, photo collages, and social media graphics.

Introduction to Adobe Photoshop:

Adobe Photoshop is one of the most powerful graphic design and photo-editing software used globally. It enables users to edit images, create digital artwork, and design graphics for various digital and print purposes. This unit builds upon the foundational skills learned in Grade 6 and introduces more advanced concepts and tools.

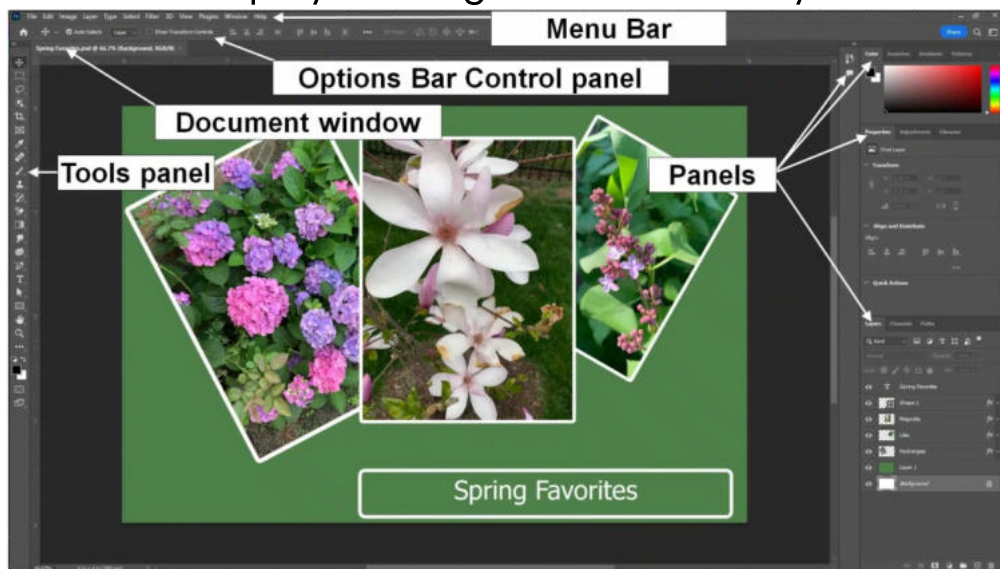

Features of Photoshop

- 1. Layer Styles** – Includes stroke, overlay, transparency, and shadow effects for layer customization.
- 2. Interactive Image Warping** – Allows reshaping and transforming images using the **Liquify** command.
- 3. Vector Support** – Enables the creation of vector-based graphics combined with pixel-based elements.
- 4. Slicing Capabilities** – Divides images into sections for web optimization.
- 5. Filters and Effects** – Applies artistic transformations such as blurring, sharpening, and sketch-like effects.

Understanding the Photoshop Workspace:

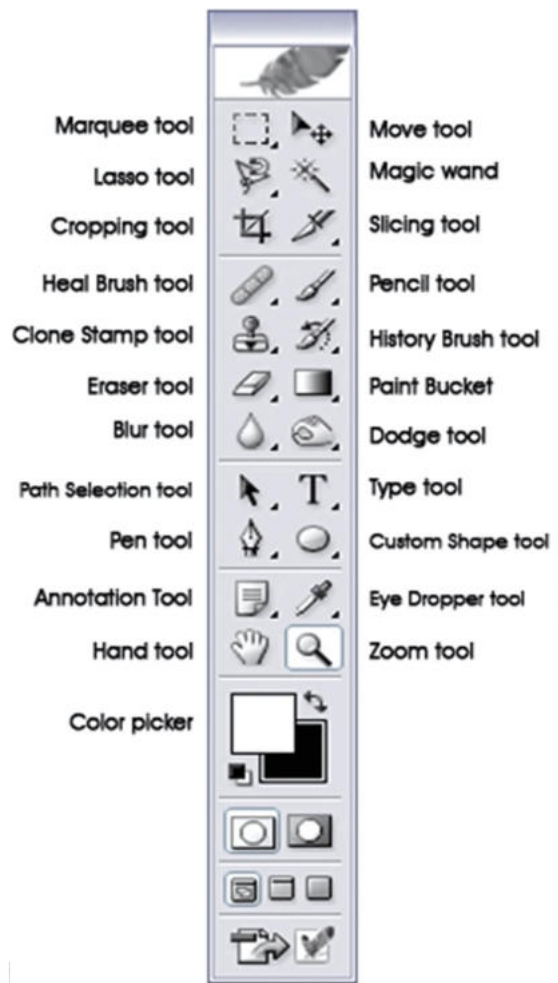

- **Menu Bar** – Provides access to file and editing functions.
- **Toolbar** – Contains tools for editing, selection, painting, and retouching.
- **Layers Panel** – Manages different image elements separately.
- **Options Bar** – Displays settings for the currently selected tool.

Photoshop Toolbox and Selection Tools:

Commonly Used Tools

1. **Move Tool (V)**: Moves selected objects or layers.
2. **Marquee Tools (M)**: Creates rectangular, elliptical, row, or column selections.
3. **Lasso Tools (L)**: Includes freehand, polygonal, and magnetic lasso for custom selections.
4. **Brush Tool (B)**: Allows digital painting with different brush types.
5. **Eraser Tool (E)**: Removes image portions.
6. **Gradient Tool (G)**: Creates colour transitions.
7. **Dodge and Burn Tool (O)**: Lightens or darkens specific areas.
8. **Pen Tool (P)**: Draws paths and shapes.
9. **Type Tool (T)**: Adds and formats text layers.

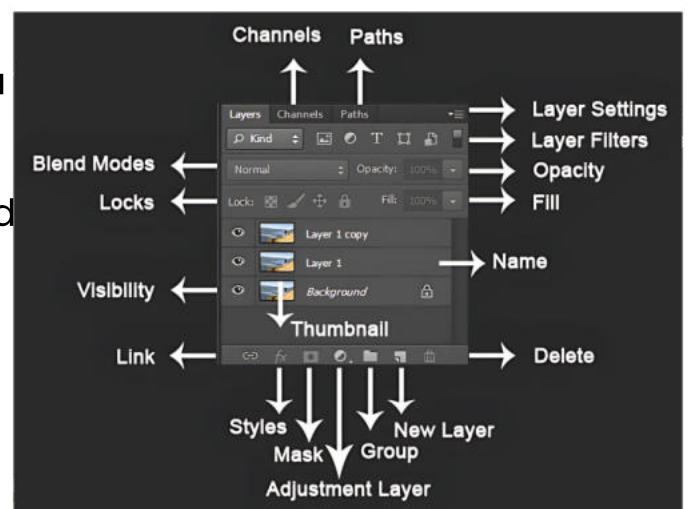

Using Layers in Photoshop:

• **Creating a New Layer:** Click **Layer > New > Layer** or press **Shift + Ctrl + N**.

• **Duplicating a Layer:** Right-click a layer and select **Duplicate Layer**.

• **Merging Layers:** Select layers and press **Ctrl + E** to merge them.

Locking Layers: Prevents accidental.

Applying Filters in Photoshop:

Filters add artistic effects to an image, such as:

1. **Blur Filters** – Gaussian Blur, Motion Blur, Lens Blur.
2. **Sharpen Filters** – Smart Sharpen, Unsharp Mask.
3. **Distortion Filters** – Liquify, Ripple, Wave.
4. **Stylized Filters** – Oil Paint, Emboss, Poster Edges.

Applying a Filter

1. Select the layer to which you want to apply the filter.
2. Navigate to **Filter > Filter Gallery**.
3. Choose a filter category and adjust its settings.
4. Click **OK** to apply.

EXERCISES

01: Choose the correct answer.

1. What is the default file format for saving Photoshop files?

- a) JPEG
 - b) PNG
 - c) PSD
 - d) BMP
-

2. Which tool is used to move objects in Photoshop?

- a) Brush Tool
 - b) Move Tool
 - c) Lasso Tool
 - d) Eraser Tool
-

3. What does the Magic Wand Tool do?

- a) Selects areas based on colour similarity
 - b) Moves layers
 - c) Draws shapes
 - d) Applies gradients
-

4. Which of the following is NOT a type of Marquee Tool?

- a) Rectangular
 - b) Elliptical
 - c) Polygonal
 - d) Single Row
-

5. Which shortcut is used to create a new layer?

- a) Ctrl + N
- b) Ctrl + J
- c) Shift + Ctrl + N
- d) Ctrl + O

6. Which tool would you use to make a freehand selection?

- a) Marquee Tool
 - b) Lasso Tool
 - c) Gradient Tool
 - d) Eraser Tool
-

7. What is the purpose of the Layers Panel in Photoshop?

- a) To edit text
 - b) To manage and organize layers
 - c) To apply filters
 - d) To crop images
-

8. Which of the following tools is used to apply color to an image?

- a) Move Tool
 - b) Paint Bucket Tool
 - c) Zoom Tool
 - d) Crop Tool
-

9. Which key is used to constrain proportions when resizing an object?

- a) Alt
 - b) Shift
 - c) Ctrl
 - d) Tab
-

10. What does the "Quick Mask" mode do in Photoshop?

- a) Saves the file quickly
 - b) Applies a quick colour fill
 - c) Allows temporary selections using brushes
 - d) Merges layers quickly
-

02: Fill in the blanks.

1. The default file format for Photoshop is _____.
2. To create a perfect circle using the Elliptical Marquee Tool, hold down the _____ key.
3. The shortcut to duplicate a layer is _____.
4. The _____ Tool is used to zoom into an image.
5. Photoshop is primarily a _____based editing software.
6. To add a new layer, you can press _____ + _____ + _____.
7. The _____ Tool is used to select areas based on similar colours.
8. The _____ Tool allows you to draw shapes like rectangles and ellipses.
9. You can lock a layer by clicking the _____ icon in the Layers Panel.
10. The _____ Tool is used to erase parts of an image.

04: Answer the following questions briefly:

1. What is Adobe Photoshop?
2. Name any two features of Adobe Photoshop.
3. What is a workspace in Photoshop?
4. What is the purpose of the Photoshop toolbox?
5. Name any two selection tools in Photoshop.
6. What is a layer in Photoshop?

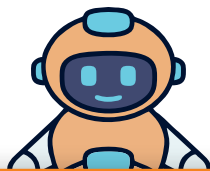

05: Provide detailed answers of the following questions:

1. Write and explain four important features of Photoshop.
2. Describe the components of the Photoshop workspace.
3. What is the Photoshop toolbox? Mention and describe any three tools.
4. Explain the use of selection tools. How are they helpful in editing images?

Viva Questions:

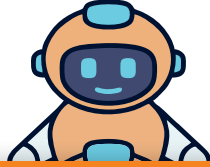

1. What is Adobe Photoshop, and what are its primary uses?
2. Explain the difference between raster and vector graphics.
3. How do you create a new file in Photoshop?
4. What is the purpose of using layers in Photoshop?
5. Describe the function of the Move Tool.
6. How do you save a file in Photoshop with all layers intact?
7. What is the Magic Wand Tool, and how does it work?
8. Explain how to apply a filter to an image.
9. What is Quick Mask mode, and when would you use it?
10. How do you reset the workspace to its default settings in Photoshop?

Lab Activity 1: Creating a Digital Poster

- Create a new file (1920x1080 pixels, 300 DPI).
- Use the **Type Tool** to add text.
- Insert an image and apply **layer styles**.
- Save as **PSD** and export as **JPEG**.

Lab Activity 2: Background Removal

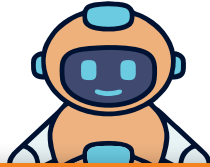

- Open an image with a subject and a background.
- Use the **Quick Selection Tool** to select the subject.
- Press **Delete** to remove the background.
- Replace it with a solid colour or new image layer.

Lab Activity 3: Applying Filters for Artistic Effects

- Import a photo and duplicate the layer.
- Apply the **Watercolor Filter** from **Filter Gallery**.
- Adjust opacity and blending mode.
- Save the final result.

Lab Activity 4: Custom Brush Creation

- Open a new file and draw a custom shape.
- Convert it to a brush preset using **Edit > Define Brush Preset**.
- Use the **Brush Tool** to paint with the new brush.

Creative Projects:

Design a Personal Logo:

- Objective: Use shape tools, text tools, and layer styles to create a unique personal logo.
- Instructions: Start with a blank canvas, use geometric shapes to build the base, add your initials with the Text Tool, and apply layer effects like gradients or shadows.

Create a Photo Collage:

- Objective: Combine multiple images into a single cohesive collage using selection tools.
- Instructions: Open 4-5 images, use the Lasso and Marquee Tools to cut out elements, arrange them creatively on a blank canvas, and add text or decorative shapes.

Design a Social Media Post:

- Objective: Create a visually appealing social media post for a product or event.
- Instructions: Set the canvas size to 1080x1080 pixels, add a background, incorporate images and text, and use layer styles to enhance the design.
